WELCOME

WELCOME FROM THE PRESIDENT AND VICE PRESIDENT

Hello, and, on behalf of our family, staff, faculty and current students, welcome to Broadview College. By choosing to continue your education at our career college, you have embarked on a pathway to success.

We want you to know that we care about your experience at our school. From the moment you first walk in the door to the time that you graduate and move on to your career, we will strive to see that you receive the support you need to reach your highest potential, achieve your dreams, and make a difference in the world.

We are committed to higher education because we believe it will increase your quality of life and ability to benefit from and contribute to your community. We will provide you with the practical skills and experiences you need to accomplish professional and personal goals.

Our admissions, academic, financial aid, career services and faculty members are here to ensure that your educational experience at Broadview College is as seamless as possible. Please approach any staff member or instructor with questions or requests for assistance. You will receive clear answers and prompt help with administrative and academic issues.

This catalog is a reference guide. In it, you will find practical information, including financial aid and scholarship information, grading definitions, satisfactory academic progress requirements, credit and course requirements for all programs, and course descriptions.

Again, we want you to remember that we care about your personal, educational and professional success, and will do everything we can to help you achieve your goals.

We look forward to seeing you in our hallways and classrooms.

Sincerely,

Terry Myhre, President

Kaye Myhre, Vice President

Ownership and Governance

Broadview College is owned by Broadview Institute, Inc., a privately traded corporation and controlled by a subsidiary corporation, C Square Educational Enterprises, Inc. Terry Myhre is the President and sole member of the board of directors.

POLICY STATEMENT

Broadview College has established internal policies in accordance with standard educational practice and federal and accrediting regulations to best serve our students. All internal policies are designed as guidelines to assist the institutions to continue to maintain high standards, remain compliant, and to provide opportunities for excellent outcomes for all students. Campus directors or their designees may, at their discretion, make exceptions to policy. However, any exception to established internal policy may not violate local, state, or federal rules, regulations or statutes, and must maintain compliance with accreditation standards.
HISTORY AND PHYSICAL DESCRIPTION

History
Broadview College, originally established as the Bryman School, founded its downtown Salt Lake City location in 1977. From its initial focus on medical assisting, the school has expanded and added new programs to reflect the changing job market and meet students' needs. In 1995, the school began awarding associate degrees, which are now offered in multiple fields. Broadview moved the downtown campus to its current location in West Jordan in 2000.

In June 2010, Broadview University changed its name from Utah Career College to better reflect the educational opportunities provided to its students. In addition to a wide range of certificate, associate of applied science and bachelor of science degree programs offered, Broadview added its first graduate degree program, a master of science in management. In 2021, as Broadview returned its focus to applied career programs and serving students in shorter, certificate and academic degree programs, Broadview voluntarily relinquished the University name, as well as the graduate programs, and made an official name change to Broadview College. Broadview offers courses in health and wellness, residentially, online, and in a blended format.

Physical Facility Description
The Broadview College campus is handicapped accessible and has facilities and equipment that comply with federal, state, and local ordinances and regulations including those required for personal safety, building safety, and health. Based on the programs offered, a variety of equipment and technologies provide students with training that is current with existing professional practices.

The West Jordan campus, Building 100, is at the west end of the block at 1902 West 7800 South. It is 17,500 square feet and contains career services, instructor and administrative offices, student services such as tutoring, and classrooms, computer labs, student commons with multiple computer stations, massage classrooms, and veterinary technology classrooms and labs.

ADMISSIONS INFORMATION

Broadview College offers an equal opportunity in all academic programs and activities, without distinction or discrimination based on race, color, sex, religion, age, gender identity, sexual orientation, nationality, ethnic origin, physical or mental disability, or veteran status.

Admissions Procedure
Inquiries regarding enrollment at Broadview College should be addressed to the Admissions Office:

Broadview College
1902 West 7800 South, West Jordan, Utah 84088
Phone: 385-501-4803
E-mail: admissions@broadviewuniversity.edu

A prospective student should schedule a personal interview. The interview will provide the student with an opportunity to discuss his or her interests and to become fully acquainted with the facility and the courses offered. The prospective student will then complete the application process by submitting an enrollment agreement prior to the selected start date. Class start dates are listed in the calendar in this catalog. An orientation is scheduled prior to each quarter start date.

Limits to Admission
Broadview Education Consortium (BEC), including Broadview College, is committed to the security and safety of the entire college community. To safeguard the wellbeing of its campuses, applicants convicted of a predatory offense or offenders required by the courts to register are prohibited from admission to the college. This includes entering upon Broadview Education Consortium property, using any Broadview Education Consortium facility, or attending any Broadview Education Consortium event.

If warranted by the particular facts, the leadership of BEC may modify any aspect of this protocol.

Admission Requirements
Broadview College admits only students who have high school diplomas or the equivalent (GED or a degree from a postsecondary institution accredited by an accrediting agency recognized by the United States Department of Education) to certificate, associate of applied science, and bachelor's degree programs. All applicants must provide proof of high school diploma or equivalent (GED); those students who are admitted based upon completion of a degree from a postsecondary institution accredited by an accrediting agency recognized by the United States Department of Education must submit official transcripts documenting completion of the degree.

A student with a diploma or associate degree from any of the following schools and enrolls or re-enrolls at Broadview College is exempt from the certificate, associate of applied science, or bachelor's degree program required admission standards.
- Broadview College (formerly Broadview University)
- Broadview Entertainment Arts University
- Globe University/Minnesota School of Business
- The Institute of Production and Recording
- Duluth Business University
- Northwest Technical Institute

Students previously accepted at BEC schools will be considered to have met admission standards based on the requirements set forth at the time of prior enrollment.

All first-time certificate or degree-seeking students taking online course(s) must successfully complete the Online Readiness Assessment prior to executing the enrollment agreement. Additionally, all first-time students taking an online class must successfully complete the Online Orientation within the student portal before starting their first online class. This orientation will teach students how to use all of the online learning tools within the student learning management system. In order to register for an online course, a student must, at a minimum, have consistent access to the Internet multiple times per week. Some online courses require certain software packages.

It is highly recommended that students own or have access to a computer equipped with the system requirements in order to succeed in online courses:

<table>
<thead>
<tr>
<th>Internet Connection</th>
<th>Broadband (cable or DSL) 10 Mbps minimum, 20 Mbps recommended</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hardware</td>
<td>Any computer purchased new within 2 years of your start date (computer, laptop, Surface)</td>
</tr>
<tr>

<td>Apple OS X v10.10 (Yosemite) or higher, OS X v10.11 (El Capitan)</td>
</tr>
</tbody>
</table>
Admission Standards

Program Requirements
(Not applicable to Certificate in Massage Therapy or Certificate in Muscle Activation Techniques® Specialist program or modules)

An applicant must satisfy one of (a-e) below:

a) Achieve minimum score on the Accuplacer test administered at Broadview as indicated for the selected program:

<table>
<thead>
<tr>
<th>Programs</th>
<th>Reading Comprehens</th>
<th>Sentence Skills</th>
<th>Arithmetic</th>
</tr>
</thead>
<tbody>
<tr>
<td>All certificate, associate degree, and bachelor's degree programs</td>
<td>230</td>
<td>230</td>
<td>205</td>
</tr>
</tbody>
</table>

b) Provide documentation of a bachelor’s degree granted by an approved institution as described in the Transfer of Credit section of this catalog.

c) Provide documentation of a minimum composite score of 21 on the ACT.
   - Effective September 2020, the ACT Superscore will be accepted. Superscoring is the process of averaging the best subject scores across English, Reading, Math, and Science from all ACT test attempts.

d) Provide documentation of a minimum composite SAT score based on the completed test year:
   - Completed June 2016 to present: minimum composite SAT score of 1060
   - Completed between March 2006 and May 2016: minimum composite SAT score of 1485
   - Completed prior to March 2006: minimum composite SAT score of 990

e) If a student took the CPAt exam through Broadview College (BVC), Globe University/Minnesota School of Business (GU/MSB), or The Institute of Production and Recording (IPR) in the past, entrance scores will be honored according to the requirements listed in the catalog at the time of past enrollment. The student may be required to take the Accuplacer exam to determine appropriate placement in lab (remedial) classes.

Math, (applicable for students who are accepted in a program which has a remedial requirement indicated on the program page in the catalog). A student who has successfully completed a college-level mathematics course at an approved institution as described in the Transfer Credit section of this catalog is exempt from taking the Algebra Lab or if in the Veterinary Technology program the Veterinary Foundations of Math course. A student who scores lower than 250 on the arithmetic component of the Accuplacer will be required to complete NS070 Algebra Lab. Veterinary Technology program students will be required to complete Veterinary Foundations of Math course.

Writing, (applicable for students who are accepted in a program which has a remedial requirement indicated on the program page in the catalog) A student who has successfully completed a college-level composition course at an approved institution as described in the Transfer Credit section of the this catalog is exempt from taking the Writing Lab. A student who scores lower than 265 on the sentence skills component will be required to complete CM070 Writing Lab.

Successful completion of foundational requirements does not exempt a student from meeting the program admission requirements.

Broadview College accepts Accuplacer scores from other institutions in cases where students have already taken the required sections of Accuplacer. Scores must come directly from the administering institution(s) to Broadview College.

A prospective student who does not pass one or more portions of the entrance exam may retake the portion(s) of the test the student did not pass. A student may be allowed a third exam only at the discretion of the dean of education/students and/or campus director. The student must provide documentation of completion of a rudimentary-level language, reading and/or math class after the second exam attempt and prior to a third attempt. Successful completion includes earning a grade of C or higher, a pass from a pass/fail course, or a letter from an administrator of WorkForce Center, Hub Center, or similar organization stating successful completion of a language, reading, or math workshop or class offered through that organization. A retest request form must be submitted to and approved by the dean of education/students prior to the student taking a third exam. Classes required will be determined by the second exam results.

Program Specific Requirements
B.S., A.A.S., and Certificate in Muscle Activation Techniques®

Programs and MAT® Modules
See Muscle Activation Techniques® programs &/or MAT® module pages of this catalog.

Massage Therapy
The technical instruction of the Massage Therapy program at BVC requires that students meet or exceed the following qualifications of study specific to massage therapy techniques courses: In order to obtain and develop technical skill and achieve satisfactory completion of the massage therapy program, students must be able to fully perform and receive massage and adjunctive applications without posing health or safety risks to themselves, their classmates, or clients. A student must have the ability to use both hands, single digits, forearms, and elbows to apply massage techniques and adjunctive therapies including kneading, gliding, compressing, grasping, pushing, pulling, shaking, lifting, rubbing, holding, stretching, tapping, and twisting tissues at various frequencies and pressure over the full range of the body. The student must also be able to maintain proper body mechanics including foot placement, leaning, leveraging body weight, supported digits, and safety practices for up to one hour without interruption. It is advisable for massage therapy applicants and students to regularly review their health histories and massage criteria with their primary health care providers to establish any risks in performing or receiving massage-type applications.

Veterinary Technology
Broadview College strongly recommends students in the Veterinary Technology program receive rabies vaccinations prior to enrolling. While the risk is low, individuals involved in animal health care professions may be exposed to the rabies virus. Students are not required to be vaccinated for rabies, but are urged to discuss rabies vaccination with their primary physicians.
Students Enrolled in Less Than a Full Program
An applicant who does not meet entrance requirements, or who is interested in taking individual courses only, may apply for admission to courses that will not lead to the awarding of a diploma or degree. A student enrolling under these circumstances is not eligible to participate in financial aid.

Transfer of Credit Policy
The evaluation of transfer credit from other institutions to Broadview College involves the following considerations:

- The educational quality of the institution from which the student transfers.
- The appropriateness and applicability of the credit earned to the student’s program at BVC in light of the student’s educational goals.
- The requirement that a minimum of 25 percent of total program credits must be completed at BVC in all certificate, diploma, associate of applied science and bachelor's degree programs.
- The minimum requirements for graduate programs are listed in the graduate section of the catalog.

Approved Institutions
Credits for successfully completed courses at institutions accredited by agencies recognized by the United States Department of Education, or in some cases institutions recognized through state regulatory bodies or recognized International institutions, may be transferred upon the approval of the designated school official at the receiving institution. Veterinary Technology program has the additional requirement of programmatic accreditation for all core requirements.

A student can request an official transcript directly from each previously attended institution. Upon receiving an official transcript, Broadview College will evaluate transfer credits. Upon request, the student must submit a catalog description or course syllabus for consideration of transfer credits.

In evaluation of transfer credit decisions, Broadview College will carefully weigh the three considerations listed above while assisting students whenever possible to avoid repetition of coursework that applies directly to their program of study.

The transcript evaluation process begins as official transcripts are received. The evaluation of transfer credit will be provided within 60 days after admission to the school and all required official transcripts have been received. In the event that a transcript is not received in a timely manner, the transcript evaluation may not be complete prior to attendance in the first quarter of classes. Students should plan accordingly.

When the transcript evaluation process is complete, the student will be notified in writing of the result of the evaluation. Service members will receive and acknowledge the Military Transfer Credit document and a copy will be retained in the student file.

The student may be required to provide course descriptions and/or syllabi for consideration of transfer. The following conditions apply:

1. All transferable credits must have been earned with a grade of C-/P or better and be at the college level of 100/1000 or above. All transferable Master’s level credits must have earned with a grade of B or better and be at the college level of 500/5000 or above.
2. A minimum of 25 percent of total program credits must be completed at BVC in all programs. Remaining program credits may be transfer credit or credits earned through advanced standing tests, professional work experience, or prior learning.
3. Credit for general education courses taken at other schools and not offered by BVC may be awarded in the appropriate general education area. For example, four credits successfully earned in American History (not currently offered at BVC) may be awarded as four credits in the social science area.
4. Postsecondary credit awarded prior to high school graduation will be considered for transfer.
5. Decisions based on transfer credit should be considered valid at the date of evaluation.
6. When curricula change, decisions about future credit transfers may be affected.
7. Transfer credit for a course may be subject to the requirement that the student verify competency in an area included in the equivalent course or satisfy that requirement in some other way.
8. The following qualifications, requirements, and limitations apply to the acceptance of transfer credits:

Qualifications, Requirements and/or Limitations Related to Transfer of Credit
Quarter/Semester: 1 semester credit = 1.5 quarter credits

General Education
General education, including the disciplines of communications, natural science/mathematics, humanities, and social science, should be an integral part of all associate and bachelor’s degree programs in order to develop critical and analytic skills and broad perspectives that are associated with those levels of education. A degree implies that the student has achieved a knowledge base in general education that complements preparation in a major field of study.

Subject areas accepted towards general education requirements include, but are not limited to, the following:

- **Humanities**, including art, humanities, languages, literature, music, philosophy, religion, and theatre.
- **Natural Science/Mathematics**, including biology, chemistry, geology, physics, mathematics, and statistics.
- **Social Science**, including anthropology, American studies, economics, geography, history, human relations, law, political science, psychology, and sociology.
- **Communications**, including composition, speech, writing, and rhetoric.

Time Limit
General education, general studies, and elective credits shall have no transfer time limit. The timeliness of credits applied to career programs will be determined when evaluating transfer credits.

Credit Amount Transferred is Different than Equivalent Course Credit
Courses approved for transfer must be comparable in nature, content, and level and match at least 75 percent of the content and objectives of the course for which the student is seeking equivalent credit. In consideration of a course for course transfer, the amount of transfer credit will not exceed the credit value for the comparable Broadview College course offering.

Curriculum Changes that Change Credit and/or Content
Courses previously taken at BVC must be comparable in nature, content, and level and match at least 75 percent of the content and objectives of the course for which the student is seeking equivalent credit.
Credit Earned in Foreign Institutions
A student with a degree, certificate, or college-level credits from a non-U.S. institution of higher education shall have those credits evaluated at the student's expense by an evaluator selected by the college. The student must provide an official transcript in the original language, a college catalog, and the translated transcript and course descriptions.

Courses that Do Not Transfer
BVC does not allow transfer credits for the following courses in the AAS Veterinary Technology program: VT224 Lab Animals, Exotics and Pocket Pets; VT259 Surgical Assisting; VT268 Dentistry; VT271 Production Animals; and VT281 Equine.

Courses that Do Not Apply Toward Graduation Requirements
In evaluating transfer credit, only courses that apply toward a student's graduation requirements in the student's program of study will be considered for transfer.

Block Transfer
Students who have completed an associate or a bachelor's degree are eligible for a block transfer of general education requirements to be distributed as determined by the transfer specialist per the conditions below in all programs. Additional general education courses may be required outside of the credits accepted through block transfer where prerequisites exist to create a foundation for further learning.

A student who has completed an associate degree will be granted a general education block transfer to fulfill all general education requirements toward an associate of applied science degree through a Broadview Education Consortium member school if the following conditions are met:
• The student has completed a minimum of three quarter-hour credits in each area of the Broadview Education Consortium member schools’ general education studies, including communications, humanities, natural science/mathematics, and social science.
• The student has completed a minimum of 30 quarter-hour credits of general education courses.

Students who have completed an associate degree will be granted a general education block transfer to fulfill a minimum of 30 quarter-hour credits of general education requirements toward a bachelor's degree through a Broadview Education Consortium member school to be distributed as determined by the transfer specialist.

A student who has completed a bachelor's degree will be granted a general education block transfer to fulfill all general education requirements toward an associate of applied science degree through a Broadview Education Consortium member school if the following conditions are met:
• The student has completed a minimum of three quarter-hour credits in each area of the Broadview Education Consortium member schools’ general education studies, including communications, humanities, natural science/mathematics, and social science.
• The student has completed a minimum of 30 quarter-hour credits of general education courses.

A student who has completed a bachelor's degree will be granted a general education block transfer to fulfill all general education requirements toward a bachelor's degree through a Broadview Education Consortium member school if the following conditions are met:
• Student has completed a minimum of six quarter-hour credits in each area of the Broadview Education Consortium member schools’ general education studies, including communications, humanities, natural science/mathematics, and social science.
• Student has completed a minimum of 54 quarter-hour credits of general education courses.

Military Transfer
College credit for military service may be awarded upon review of a military transcript. Minimally, a student will be awarded credit toward SS140 Interpersonal Relations for the successful completion of basic training. A student may also receive credit for SS103 Global Citizenship for completing basic training. Additional coursework on the transcript will be matched to comparable BVC courses.

Military transcripts to document American Council on Education (ACE) recommended college credit for military training and occupational experience can be requested from:
• Joint Service Transcript (JST) for the US Army, Marine Corps, Navy and Coast Guard.
• Community College of the Air Force (CCAF) for the US Air Force and Space Force.

The JST is ordered electronically when a student applies for admission. The CCAF request needs to have a hard signature by the student and mailed to the CCAF.

Core and General Education Requirements
The general education requirement for an AAS degree is a minimum of 30 quarter-hour credits in the general education disciplines, with a minimum of three credits in each of the following areas: communications, humanities, natural science/mathematics, and social science.

The general education requirement for a bachelor’s degree is a minimum of 54 quarter-hour credits in the general education disciplines, with a minimum of six credits in each of the following areas: communications, humanities, natural science/mathematics, and social science.

A student enrolling in a bachelor's degree program who has graduated with an AAS degree may be eligible for a core block transfer of up to 60 credits. The student will be required to complete 30 percent of the program at the 300/400 level.

The institution reserves the rights to alternate courses within the program to improve the quality of the program of study.

Upon the approval of the network dean or dean of education/students, general education coursework may be accepted as specialization elective coursework if it is determined to be commonly required in that program area. A course accepted as a specialization elective will not be accepted as a general education course.

Advanced Standing Tests
Credit may be awarded for a student’s proficiency in a subject as demonstrated through performance on an advanced standing test. The student must request and arrange the test through the academic services department and take the test before the beginning of the quarter in which the course will be required. Not all courses have advanced standing tests.

Prior Learning Assessment
Broadview College will determine if learning received outside of the traditional college classroom prior to enrollment at BVC is equivalent to academic curriculum and eligible for college credit. BVC follows the academic and administrative standards of the American Council on Education (ACE) for review of learning gained outside of the formal classroom environment.
Prior learning credit will be designated as EC or PL on the student’s academic transcript. If the credit granted is for a course required for the program, the amount of transfer credit will not exceed the credit value for the comparable BVC course offering.

If the credit granted is for a course not required for the program, the appropriate semester-hour credit conversion may be used. Credit awarded for one course may not be used toward any other course.

A student seeking to receive credit for prior learning will submit original copies of appropriate documentation of completion for each course where prior learning credit is being sought to the academic services department for approval. The department will ask the student to provide BVC with additional information if necessary for proper evaluation.

**Professional Work Experience**

Broadview College offers a qualified student the opportunity to obtain credit for previous experience in which the student gained occupational, supervisory, or management skills in industry, business, military, professional, or service occupations.

Work experience credit is designated as EC or WE on a student’s academic transcript. The student must submit the required forms and documentation for work experience credit to the academic services department prior to the start of the quarter in which the class is required to be taken. Work Experience Request forms and BVC policies are available upon request from school officials.

Once the student has completed and submitted all of the required documentation, the academic services department, with the assistance of faculty in the respective department for which credit-equivalency is being requested, will evaluate the request. Documentation generally includes job assignment descriptions, performance reports, and/or supervisor letters attesting to the dates of employment, assignments, specific duties, and quality of work performed. Requests for work experience credit will not be considered for evaluation if received without appropriate documentation.

Work experience considered for credit must have been at increasingly rigorous levels of learning equivalent to the level of difficulty associated with college coursework. Part-time experience is considered for credit on a proportional basis.

**Transfer of Credit to Other Institutions**

Broadview College offers career-focused bachelor’s degrees, associate of applied science degrees, and certificates. The purpose of these degree and certificate offerings is to provide career-specific education and general education credits that will lead to rewarding employment. While it is unlikely that credits will transfer to a state college or university, some institutions will accept BVC credits. Credit transfer is always determined at the sole discretion of the receiving institution. BVC cannot provide information on whether outside institutions will accept BVC credits. A student interested in transferring to another college or university should check with that institution prior to enrolling at BVC. It is not the mission or the intent of BVC to act as a transfer institution.

**Articulation Agreement**

Broadview College (formerly Broadview University) has an articulation agreement with American Business and Technology University. Articulation agreement indicates that a student can take credits earned at Broadview and be eligible for credits at American Business and Technology University. Please contact an academic services staff member for program specific information.

**Partnership Agreement**

Broadview College has a partnership agreement with MAT®. MAT® provides exam prep and certification testing conducted at MAT® headquarters in Denver, Colorado or Toronto, Canada.

**Consortium Agreement**

Students enrolled at Broadview College, the Institute of Production and Recording, and Minnesota School of Cosmetology have the option to earn credit for equitable courses taken at any of these institutions. The consortium agreement between these institutions meet the schools’ programmatic, local, state, and national licensing and accreditation criteria.

These institutions have common ownership and a centralized support system of personnel provided by the Broadview Education Consortium, which is largely comprised of Broadview College central support personnel. The agreements provide students with the flexibility to take equitable courses from all campus locations, including online coursework, which is administered by a centralized, shared online virtual learning environment and delivered by Broadview College. Student services, including satisfactory academic progress and financial aid records, will be maintained and monitored by the campus where the student will receive his/her diploma or degree. Each campus will be ultimately responsible for the delivery of its programs and the satisfaction of its students.

Students who elect to attend a course at a location other than their home institution (primary attendance location) will have their total tuition and fees charged by their home institution. All financial aid will be awarded and dispersed from the home institution.

The home institution is required to deliver at least 50 percent of the overall program and award the appropriate credential to the student. A copy of the consortium agreement is kept on file at each campus. Students have the right to review and acknowledge agreement prior to taking courses at other campuses.

**Late Admission**

A student may not register for classes later than the third day of the first week of classes. An application received after this point will be retained on reserve status for the next class start date.

**FINANCIAL INFORMATION**

Broadview College participates in the administration of most federal Title IV student financial aid programs including Federal Pell Grants, Federal Supplemental Educational Opportunity Grants, Federal Stafford Subsidized/Unsubsidized Student Loans, and Federal Parent Loans to undergraduate students. Programs of study are approved by the state-approving agency for Veterans’ Education Benefits (see Accreditations and Approvals section of this catalog). Additional information and applications may be obtained by contacting the campus financial aid office.
Financial Aid

Scholarships and other forms of financial aid are available for those who qualify. For further information on financial assistance, contact the financial aid office at the school. All financial aid awards will be disbursed directly to the student's account beginning the second week of each quarter.

Some business firms and organizations encourage employees to continue their education by paying part or all of their tuition and fees. Since there is considerable variation in this practice, it may be worthwhile for you to check with your employer.

The school is an eligible institution approved by the U.S. Department of Education for participation in the following programs:

- Federal Pell Grant
- Federal Supplemental Education Opportunity Grant (FSEOG)
- Federal Direct Loan Program
- Federal Direct Parent Loan for Undergraduate Students (PLUS)
- Student Education Loan Fund (SEL)

Additional funds may be available through:
- Division of Rehabilitation Services
- Bureau of Indian Affairs (BIA)
- U.S. Department of Veterans Affairs (VA)

Outside resources must be reported to the financial aid office. The financial aid office is not responsible for locating those funds.

U.S. Department of Education School Code

Broadview College: 011166

Separate applications may be required.

Gift aid is awarded annually based on the fiscal year dates of July 1 through June 30. Financial aid is awarded and credited on a quarterly basis at Broadview College. A student attending in more than one fiscal year period must reapply for financial aid assistance. A student interested in financial aid should schedule an appointment to meet with financial aid.

See website for current interest rates and loan origination fees: https://studentaid.ed.gov/sa/types/loans/interest-rates

### PRIMARY SOURCES OF FINANCIAL AID AND HOW TO APPLY

<table>

</tr>
</thead>
<tbody>
<tr>
<td><strong>GIFT AID</strong></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>FEDERAL PELL GRANT PROGRAM</td>
<td>Grant based on financial need. The student receives notification of eligibility with receipt of Student Aid Report (SAR), which must list the appropriate school code for determination of amount based on cost and credits.</td>
<td>$220 to $6,495</td>
<td>Free Application for Federal Student Aid (FAFSA) form</td>
</tr>
<tr>
<td>FEDERALSUPPLEMENTAL EDUCATION OPPORTUNITY GRANT (SEOG)</td>
<td>Grant is based on financial need and is awarded by the institution. Notification is made approximately four weeks after start date.</td>
<td>$400 to $4,000</td>
<td>Free Application for Federal Student Aid (FAFSA) form</td>
</tr>
<tr>
<td><strong>LOANS</strong></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>FEDERAL DIRECT LOAN/SUBSIDIZED AND UNSUBSIDIZED*</td>
<td>Long-term, low interest loan (current rate is 3.73%*). Payment deferred until six months after student leaves school or attends less than half-time. Need-based calculation. *Rates are effective 7/1/21. Check the website for current interest rates and loan origination fees. <a href="https://studentaid.ed.gov/sa/types/loans/subsidized-unsubsidized#how-much">https://studentaid.ed.gov/sa/types/loans/subsidized-unsubsidized#how-much</a></td>
<td>Up to $5,500 (Dependent), $9,500 (Independent); $6,500 (Dependent), $10,500 (Independent); $7,500 (Dependent), $12,500 (Independent)</td>
<td>Free Application for Federal Student Aid (FAFSA) form, Master Promissory Note, and Entrance Counseling</td>
</tr>
<tr>
<td>FEDERAL DIRECT PARENT LOAN FOR UNDERGRADUATE STUDENTS (PLUS)*</td>
<td>Long-term, low interest loan (current rate is 6.28%*) for parents of dependent undergraduates. *Rates are effective 7/1/2021. Check the website for current interest rates and loan origination fees. <a href="https://studentaid.ed.gov/sa/types/loans/plus/parent#how-much">https://studentaid.ed.gov/sa/types/loans/plus/parent#how-much</a></td>
<td>Up to cost of attendance minus all other financial assistance</td>
<td>Free Application for Federal Student Aid (FAFSA) form and Federal PLUS Master Promissory Note processed through school and private lender</td>
</tr>
<tr>
<td>ALTERNATIVE LOAN PROGRAMS: SEE FINANCIAL AID OFFICE</td>
<td>Supplemental, variable interest rate loans are available. Deferment of principal and interest while in school at least half-time is available. The loan may be used for less than half-time attendance and does not require a co-signer if the borrower meets credit requirements. Alternative loans are privately funded.</td>
<td>Up to tuition, fees, and book costs (Lender determines amount awarded based on various factors)</td>
<td>Applications processed through the school</td>
</tr>
<tr>
<td>STUDENT ACCESS (StA) PROGRAM</td>
<td>StA is an alternative loan program with third-party servicing. The interest rate is 5%. StA loans require minimum monthly interest repayment of $20 per month capped at $110 per month while in school. Student must be enrolled and charged for 12 credits or more per quarter and student must have applied for and been denied a privately funded alternative student loan. The loan amount is calculated using maximum federal, state, private, and institutional financial aid eligibility, regardless of the amount received or borrowed. The student can borrow up to the direct cost of tuition and fees. The disbursement must be matched with equal outside funding on account. If loan payments are delinquent, future disbursements will be placed on hold until delinquency is resolved. Early withdrawal will result in loss of disbursement eligibility for that quarter. If you qualify for this loan, awarded funds will be applied directly to your student account as a credit. No check or other cash monies will be given or refunded to you at any time.</td>
<td>$100 minimum up to $1,000 per quarter and a maximum of $16,000 per lifetime</td>
<td>Applications processed through the school</td>
</tr>

</table>
Cancellation and Refund Policy

(This section does not apply to international applicants and students. International applicants and students should refer to the International Student Information, including the International Student Refund Policy, and International Student Tuition sections of this catalog).

The student will receive a refund of money paid:

1. When a student is not accepted for admission. All tuition, fees, and other charges that have been paid will be refunded. Any student who enrolls in a program of study will receive written notice of acceptance or rejection. The date of acceptance or rejection will be the delivery date of the notice. If the notice is delivered by mail, it will be the postmarked date of the letter.

2. When written notice of cancellation is given prior to the end of the initial add/drop period of the initial quarter of training, all tuition, course fees, and other charges will be refunded.

3. When a student ceases attendance or provides written notice of cancellation or withdrawal after the start of the quarter, but before completion of sixty (60) percent of the quarter, the amount charged for tuition and fees for the completed portion of the course shall not exceed the prorated portion of the total quarter’s earned charges for tuition and fees arrived at by multiplying the total quarter’s earned charges for tuition and fees by the ratio of the length of the completed portion of the quarter to the total length of the quarter. (A refund policy determines the amount of institutional charges that the school has earned and not earned based on the date the student ceases attendance).

4. If the student ceases to attend school after completing sixty (60) percent of the quarter, the student will be charged at one hundred (100) percent of the tuition, fees and other charges for the term.

Written notice of cancellation or withdrawal will take place on the date the letter is postmarked, or in a case where the notice is hand carried, it shall occur on the date the notice is delivered to the school.

The reason for a student’s cancellation or withdrawal does not affect how the cancellation and refund policy is applied.

Whether or not notification is given, the date of withdrawal is based on the date the student ceased attendance.

Broadview College will acknowledge in writing any valid notice of cancellation within ten (10) business days after receiving the notice, and within thirty (30) business days will refund to the student any amounts due the student and cancel any tuition or fees in excess of those due under the Return of Title IV Funds Policy.

A student may be entitled to a refund of equipment and supply costs if the equipment and supplies are in a condition suitable for resale and returned within 20 days of withdrawing. Any student who enrolls in a course may request a copy of the current list of books and prices. The cost of returned books or books not suitable for resale may be added to the cost of tuition and deducted from the tuition refund.

The school does not negotiate promissory notes or instruments received as payments of tuition or other charges.

Minimum Terms for Tuition Payment

Students who are not eligible or do not wish to participate in any of the financial aid programs available must pay tuition in advance or establish a payment plan with the financial aid department before the first day of class(es) quarterly.

Students whose financial aid is insufficient to cover the total cost of fees, tuition, and books must establish a payment plan prior to the first day of class(es) quarterly.

Student accounts more than five business days past due are subject to a student accounts hold until arrangements are made to bring their accounts current. Students who fail to fulfill the financial arrangements agreed upon may be withdrawn from school and may re-enter only after making full payment of the delinquent portion of the account.

All accounts must be current prior to taking final exams and/or prior to the last scheduled class session, unless other arrangements have received prior approval. Student accounts that are more than ninety (90) days past due may be sent to a collection agency.

A fee of $30 will be charged for each returned check. A second returned check will result in the requirement that future payments can only be made by credit card or money order.

Students using Ch31 or Ch33 and waiting for the VA to make tuition and fee payments will not be penalized provided the student furnishes the campus with a certificate of eligibility for entitlement to educational assistance under Chapter 31 or Chapter 33 no later than the first day a covered student starts his/her program. Students will continue to have access to classrooms, the library, and school facilities and resources. Students do not need to borrow money to cover costs while waiting for payment, and students will not be charged a late fee or penalty. If a student using Ch31 or Ch33 has received VA funds on their account and then decides to change their schedule or the student’s status changes to inactive/withdrawn/expulsion, the school will refund the overpayment, or balance, owed back to the VA. The student is responsible for any remaining balance owed on their school account.

Return of Title IV Funds

The Return of Title IV Funds Policy applies to any student who receives Title IV funding and withdraws. The withdrawal process is defined as occurring when a student notifies, orally or in writing, the academic services department of his/her intent to withdraw. Whether or not notification is given or whether or not the student begins the withdrawal process, the school will establish the date of withdrawal as the date the student ceased attendance. The Return to Title IV Funds formula determines the amount of Title IV funds the student has earned at the time the student ceases attendance and the amount of Title IV funds the student must return. Refunds will be made to the federal programs within 45 days of the date or determination.

The amount of Title IV funds earned by a student is based on the calendar days from the term start thru the last date of attendance. The amount of Title IV funds a student earns is a proportional calculation based on the amount of time the student attends school through sixty (60) percent of the quarter. If a student ceases to attend school after sixty (60) percent in the quarter, the student earns one hundred (100) percent of the Title IV funds. If the amount of Title IV grant or loan funds disbursed to the student is greater than the amount a student earned, unearned funds must be returned.
If the amount of funds was less than the amount the student earned, the student may be eligible to receive a post-withdrawal disbursement in the amount of the earned aid not received, but otherwise earned.

If it is determined that unearned Title IV funds must be returned, the responsibility is shared between the school and the student. If the financial aid funds earned don’t cover the student’s charges for that term, the student will be billed. If the financial aid funds exceed the amount earned, the institution will follow the distribution policy.

Return of Title IV Funds Distribution Policy
In accordance with 34 C.F.R. 688.22(j), Return of Title IV Funds will be distributed in the following order:
1. Unsubsidized Federal Direct Stafford Loans
2. Subsidized Federal Direct Stafford Loans
3. Federal Direct Plus Loans
4. Federal Pell Grants
5. Iraq and Afghanistan Service Grants
6. Federal SEOG Program
7. Other Title IV grants or loan assistance

The return of non-Title IV funds will be distributed in the following order:
1. Non-federal alternative loans
2. Other outside sources

Any excess funds after the distribution policy has been applied belong to the student.

Post-Withdrawal Disbursement (PWD)
A PWD is due when the amount of Title IV aid earned is greater than the amount of Title IV aid disbursed. The actual amount of the PWD is the difference between the amount of Title IV aid earned and the amount of Title IV aid disbursed.

If outstanding charges exist on the student’s account, the college may credit the student’s account with all or a portion of the PWD. However, if Title IV loan funds are used to credit the student’s account, the college must first notify the student/parent and provide the opportunity to cancel all or a portion of the loan.

Any amount of a PWD that is not credited to the student’s account must be offered to the student within 30 days of the date that the college determined that the student withdrew. The offer must be made in writing and will also notify the student that no PWD will be made if the student does not respond within 14 days of the date that the college sent the notification. Students will be informed that they may accept or decline some or all of the PWD that is not credited to their accounts.

If the student responds within 14 days the PWD funds will be disbursed as soon as possible, but no later than 120 days from the date that the college determined that the student withdrew. If the student responds late (after 14 days have passed, but prior to the 120-day deadline) the college may choose to make the PWD at its own discretion, depending on the circumstances. The student is reminded that the college has no obligation to make a PWD after the 14-day timeframe.

Title IV Verification Policy
If a student’s financial aid application is selected for review in a process called verification, the school is required to collect certain documents and adhere to deadlines for processing the application.

Once the student has submitted the required documentation to the financial aid office, the financial aid administrator will make the appropriate corrections to the application information and submit it to the central processing system. If, as a result of verification, the applicant’s Title IV eligibility changes, the financial aid administrator will notify the student via a new award letter and in-person consultation (if possible) of the student’s new Title IV eligibility.

Broadview College requires the following from an applicant selected for verification:

**Dependent Applicant**
- Dependent Verification Worksheet
- Copy of student’s and parents’ federal 1040, 1040A, or 1040EZ official tax transcript (if filed)
- Copy of student’s federal 1040 official tax transcript (if filed)
- W-2 forms for non-tax filers and if separation of income is necessary
- If a student/parent did not use the IRS data retrieval process or used the process but changed data after it was retrieved, they must provide a copy of their tax transcript provided by the IRS.

**Independent Applicant**
- Independent Verification Worksheet
- Copy of student’s federal 1040, 1040A, or 1040EZ official tax transcript (if filed)
- If married, copy of spouse’s and student’s federal 1040, 1040A, or 1040EZ official tax transcript (if filed)
- If a student didn’t use the IRS data retrieval process or used the process but changed data after it was retrieved, the student must provide a copy of their tax transcript provided by the IRS
- W-2 forms for non-tax filers and if separation of income is necessary

The deadline for submitting verification documents is the earlier of 30 days after the last day of attendance or 30 days after the last day of the award year. If an applicant fails to submit the required documents to verify the data by the deadline, no Title IV awards can be made to the student and any Title IV funds disbursed in the award year are immediately refunded by the school which may cause the student to owe money to the school.

**SCHOLARSHIPS**

**Military Active Duty/Retired Scholarship**
Broadview College offers a scholarship designed to reward students for their military service to our country. Active duty and retired service members of the United States Army, Navy, Air Force, Marines, Coast Guard, Drilling Reserve/National Guard, and Space Force are eligible for the scholarship. This scholarship cannot be used in conjunction with, or in addition to, any other Broadview College military scholarship. The scholarship is effective the date the application is completed and is not retroactive. Students will be responsible for costs including books, supplies and fees associated with the program or classes enrolled.

**Award Amounts:** 5% off tuition for Muscle Activation Techniques® students / 25% off tuition all other programs

**Eligibility Guidelines**
1. Students must provide a copy of their DD214 or most recent LES statement.
2. Students must be enrolled in a non-credit short-term module or enrolled in at least 6 credits in a certificate, associate or bachelor degree program to be eligible.
3. Award amounts are designated for tuition only and will be applied after the add/drop period.
4. Students must maintain satisfactory academic progress or they will lose eligibility for the scholarship.
The academic services department will evaluate credit for military education or occupational courses taken while in the military for credit applied toward a BVC program. The evaluation will follow recommendations from the American Council on Education (ACE) on transferring college credit for military training and occupational experience.

**Military Advantage Scholarship**
Broadview College offers a military advantage scholarship for honorably discharged Veterans who are enrolled in a Muscle Activation Techniques® non-credit, short term module or registered in at least 6 credits in an undergraduate program, and making satisfactory academic progress. If an undergraduate student falls below the credit requirement, the award will be forfeited at that time.

This scholarship cannot be used in conjunction with or in addition to any other military scholarship the institution offers. Scholarship is effective the date the application is completed and is not retroactive. The Military Advantage Scholarship supplements any additional military education benefits (i.e., GI Bill®/College Fund) as well as other grants and loan programs available to students. The award will be applied as a credit to tuition on the receiving student’s account.

**Award Amount:** 5% off tuition for Muscle Activation Techniques® students / 10% off tuition for all other programs

*Documentation with DD214 or most recent LES statement is required to determine Veteran eligibility unless student is currently receiving funds from a Federal Veteran’s Education Program with the school. These programs include, Chapter 33-Post 9/11 Bill, Chapter 30-Montgomery GI Bill®, Chapter 31-Vocational Rehabilitation, 1606-REAP, 1607-Selected Reserve, VEAP, and Federal Tuition Assistance. The academic services department will evaluate credit for military education or occupational courses taken while in the military for credit applied toward a BVC program. The evaluation will follow recommendations from the American Council on Education (ACE) on transferring college credit for military training and occupational experience.*

**GI Bill®** is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by the VA is available at the official U.S. government Web site at [https://www.benefits.va.gov/gibill](https://www.benefits.va.gov/gibill).

**Purple Heart Scholarship**
Broadview College is proud of our country’s heroes who have given so much so that we may enjoy our freedom. In recognition of their selfless sacrifices, we offer the Purple Heart Scholarship to service members and veterans who were wounded in the Gulf Wars: Operation Desert Storm, Operation Enduring Freedom, and Operation Iraqi Freedom. Spouse/domestic partner or dependents of service members killed in action during these conflicts are also eligible for this scholarship.

The scholarship cannot be used in conjunction with or in addition to any other institutional scholarship. Scholarship is effective the date the application is completed and is not retroactive.

A student approved for this scholarship will be awarded an amount to cover all remaining tuition and fees once elected federal and state financial aid, military aid, and Veterans Affairs benefits have been deducted from the total amount.

To determine eligibility, a student must fill out a FAFSA to receive this award. Students must be registered for 12 credits or more to be eligible for the quarter or the award will be forfeited from the point that the student falls below 12 credits.

Graduate students must be registered for at least 6 graduate credits to be eligible for the quarter.

Students must provide a copy of your DD214 and/or orders of being awarded the Purple Heart. If a dependent, the student must provide his/her military ID card. A student can only receive the Purple Heart Scholarship as a dependent of the qualifying military personnel if the student is considered a dependent of that person based on the U.S. Department of Education’s Title IV determination of the dependency status. Application materials must be submitted to the financial aid office.

**BEC Matching Scholarship**
Broadview Education Consortium (BEC) wants to encourage and reward students for finding outside scholarships and grants to help fund their educational expenses. Outside scholarships help reduce future indebtedness. Therefore, BEC has established a matching scholarship for outside scholarships and grants.

**Award Amount:** $1,000 maximum per academic year (from initial quarter of awarded scholarship)

**Eligibility and Award Guidelines**
1. There is no deadline.
2. Anytime a student secures an eligible scholarship or grant and funds are applied to the student’s account, BEC will match it. BEC will match multiple scholarships and grants during an academic year, but the total amount of the BEC Matching Scholarship will not exceed $1,000 per academic year. This match may require an adjustment to the student’s financial aid package. If an adjustment must take place, loans will be reduced first.
3. If the outside scholarship is incremental, the BEC Matching will also be incremental. For example, if the outside scholarship covers two quarters the BEC Matching will be disbursed evenly into the same two quarters.
4. No essay or application will be required. The BEC Matching Scholarship will simply match any outside eligible scholarships that the student can secure. The financial aid office at the student’s home campus will automatically match the outside scholarships.
5. This BEC Matching Scholarship will be recurring as long as the outside scholarship is recurring or until $1,000 match has been reached each academic year.
6. The scholarship will be completely refunded if the student withdraws completely from the college during the term it is applied. This means that a student who fully withdraws will have the scholarship eliminated from their ledger, which may result in the student owing additional funds to the college.
7. All funds will be paid directly to the college to cover educational expenses or will be used to reduce the student’s loans.
8. The BEC Matching Scholarship will not match federal funding, state funding, military funding, employer tuition reimbursement, or family payments or any Broadview University, Institute of Production and Recording, or Minnesota School of Cosmetology scholarship program.
9. Students must be enrolled in an approved Broadview program.
10. Students must be enrolled in a minimum of 9 credits to be eligible per quarter.
Business Alliance Scholarship

Broadview College realizes the important role the business community plays in a successful economy and the global competitiveness that is critical to the growth of our workforce. Partnerships that promote visions for improving the workforce and thereby improve the economy are integral to BVC’s mission. In order to form strong partnerships for building a globally competitive workforce, Broadview offers the Business Alliance Scholarship. Eligible students are currently employed by businesses that have taken the necessary steps to become approved BVC Business Alliance partners and who are enrolled in a BVC degree program.

Scholarship Recipient Criteria

A student currently employed by an approved Business Alliance partner will be required to show proof of employment at the time of enrollment and each academic year thereafter.

Application materials must be submitted to the financial aid office.

Award Amount: 10% off tuition

STA Scholarship

Award Amount: Up to the direct cost of tuition and fees or $1,500 maximum per quarter and a $24,000 maximum per lifetime.

Eligibility and Award Guidelines

1. Student must be eligible for and have exhausted the quarterly maximum borrowing under the StA Loan in order to receive the scholarship in any given quarter.
2. Applicants must be enrolled in a degree seeking undergraduate program.
3. Students must be enrolled and charged for 12 or more credits in order to be awarded the scholarship.
4. Student must maintain satisfactory academic progress or the award will be forfeited from the point the student fails to do so.
5. Student must not be in arrears with financial aid and may not have a balance owed to Broadview College.
6. For students who qualify for this scholarship, awarded funds will be applied directly to the student account as a credit. No check or other cash monies will be given or refunded to students at any time.
7. The award will be forfeited if attendance is discontinued or interrupted.
8. There are no exceptions or appeals for this scholarship.

Professional Exam Scholarship

Broadview College encourages students to seek professional credentials in their fields. The school offers Professional Exam Scholarships to help students cover examination fees.

The chart below lists qualifying programs, exams and courses, as well as maximum dollar values.

Guidelines

1. The applicant must be:
   • A current student and/or graduate in good standing enrolled in at least six quarter-hour credits.
   • Enrolled in the relevant program for the desired professional exam.
   • Currently enrolled in, or have successfully completed, the qualifying course for each professional exam as listed above.
2. Have a GPA 3.0 or higher.
3. Award recipients will be identified at the point selection criteria is met.
4. The professional exam must be taken within six months following graduation.
5. Award amounts are designated for the professional exam.

Selection Criteria includes the requirements stated above, as well as evidence of successfully passing the professional examination.

Payment

The scholarship covers the fees for taking each professional exam up to the maximum amount listed in the chart. Each student can receive only one Professional Exam Scholarship per exam type.

Scholarship recipients will receive reimbursement by an account balance adjustment for test fees upon submission of documentation of the passage of the examination.

Greenspan Scholarship

The Greenspan scholarship has been created in honor of Jerry Greenspan, a very special member of the MAT® community who empowered many individuals to learn MAT®. He passed away in 2020. Jerry was dedicated to promoting MAT® education to the world with a specific passion to help the medical community understand the impact of MAT® on the overall health of clients. This scholarship will be offered one to two times per year and will be awarded to the recipient that best meets the eligibility requirements of this scholarship program.

A committee of dedicated individuals who were long-term co-workers and friends to Jerry Greenspan will review all applicant information. This team is committed to using this opportunity to carry on the legacy of Jerry Greenspan. Jerry’s business partner will lead the committee and will report their top recipient to Broadview College.

Broadview’s MAT® academic department will review eligibility requirements for approval. The review process will include a 30-day time period once applicant registration has closed. The applicant that meets eligibility requirements, shows the desire to continue learning, and displays the strongest drive to make a difference using this new skillset will be awarded this scholarship. The selection process will include reviewing past education of the individual applicants to understand their dedication to education and the goals behind the education they chose. Applicants must demonstrate their desire to help others through their work in an essay format. Having a sincere passion to help others will weigh heavily in the selection process. Potential phone interviews may take place in the final days of the review process.

Award Amounts: $4,200

Eligibility Guidelines

Students must be a licensed practitioner and first-time MAT® student.
TUITION & FEES
- A.A.S. Veterinary Technology Tuition Effective July 1, 2019
- Muscle Activation Techniques (MAT®) Specialist Certificate Program and MAT® Modules Tuition Effective October 1, 2019
- B.S. and A.A.S. Muscle Activation Techniques (MAT®) Programs Tuition Effective January 6, 2020
- Massage Therapy Certificate Tuition Effective October 5, 2020

Course Fees, including lab fees, textbook/eBooks, supplies: Vary from $50 to $330 per course*
*Students may request a fee list to determine the appropriate fees/cost for their program. See program fees below for details.

B.S. Muscle Activation Techniques®

Tuition: $490 per credit MAT courses: MAT205, MAT210, MAT215, MAT220, MAT225, MAT230, MAT235, MAT420
$375 per credit MAT courses: MAT460, MAT465, MAT470, MAT475, MAT480, MAT485, MAT490
$375 per credit non-MAT courses
180 credit minimum, Total tuition: $71,640
Full-time Students (12 QUARTERS, 36 MONTHS) Approximate resource fees/books & supplies (varies depending on elective choices): $4,100

Estimated Cost of Attendance (based off standard academic year of three quarters and participating at a full-time course load):

Additional costs: Students are required to cover their own travel and personal expenses to the Colorado MAT® facility, including but not limited to transportation (local automobile expenses or bus fare and/or airfare if applicable), meals, lodging if applicable, and other personal expenses.

Single-Subject Enrollment

Tuition: $375 per credit
(1 QUARTER, 3 MONTHS) Course Fees, including lab fees, textbook/eBooks, supplies: Vary from $50 to $330 per course*

Additional costs for students taking a veterinary technology or massage therapy course: Students are charged $5 per quarter to help offset costs the school incurs to cover students for professional liability coverage. The school does not provide health insurance coverage for students. Refer to the Health Insurance section of the catalog.

Lab fees are applied to individual veterinary technology and massage courses, see above.
Additional costs: Participants are responsible for purchasing textbooks on their own. Students are required to cover their own travel and personal expenses to the Colorado or Toronto MAT® facility, including but not limited to transportation (local automobile expenses or bus fare and/or airfare if applicable), meals, lodging if applicable, and other personal expenses. Tuition can be paid in full or students can make three payments of $1,400. Participants on a payment plan will be responsible for making the first payment prior to the start of the course, the second payment at the start of week four and the third payment at the start of week eight.

If a participant is delinquent on a payment, they may be blocked from the class and will not get access until paid. The final payment must be received by week eight in order to continue in the online coursework and to be eligible to attend the exam prep & certification exam in Denver, Colorado or Toronto, Canada. Tuition is not refundable on or after the first day of class. Credit card or electronic check payments are accepted through the student portal.

Tuition is not refundable on or after the first day of class. Credit card or electronic check payments are accepted through the student portal.

Muscle Activation Techniques (MAT)® Specialist Refresher Modules (Non-Credit, Short-Term)***
Tuition: $895 per module
This includes the MAT® eBook manual.
(EACH MODULE IS 12 WEEKS ONLINE)
Participants are responsible for purchasing textbooks on their own.
Tuition is due prior to course enrollment and is not refundable after the first date of access in the course. Credit card or electronic check payments are accepted through the student portal.

Muscle Activation Techniques (MAT)® Mastery Refresher Modules (Non-Credit, Short-Term)***
Tuition: $499 per module
This includes the MAT® eBook manual.
(EACH MODULE IS 6 WEEKS ONLINE)
Participants are responsible for purchasing textbooks on their own.
Tuition is due prior to course enrollment and is not refundable after the first date of access in the course. Credit card or electronic check payments are accepted through the student portal.

Muscle Activation Techniques (MAT)® Mastery Modules (Non-Credit, Short-Term)***
Tuition: $1,200 per module
This includes the MAT® eBook manual.
(EACH MODULE IS 6 WEEKS ONLINE + EXAM PREP & CERTIFICATION EXAM)
Additional costs: Participants are responsible for purchasing textbooks on their own. Students are required to cover their own travel and personal expenses to the Colorado or Toronto MAT® facility, including but not limited to transportation (local automobile expenses or bus fare and/or airfare if applicable), meals, lodging if applicable, and other personal expenses.
Tuition is due prior to course enrollment and is not refundable after the first date of access in the course. Credit card or electronic check payments are accepted through the student portal.

Muscle Activation Techniques (MAT) Rx® Modules (Non-Credit, Short-Term)***
Tuition: $4,200 per module
This includes the MAT Rx® eBook manual.
(EACH MODULE IS 12 WEEKS ONLINE + EXAM PREP & CERTIFICATION EXAM)

Additional costs: Participants are responsible for purchasing textbooks on their own. Students are required to cover their own travel and personal expenses to the Colorado MAT® facility, including but not limited to transportation (local automobile expenses or bus fare and/or airfare if applicable), meals, lodging if applicable, and other personal expenses.

Tuition is not refundable on or after the first day of class. Credit card or electronic check payments are accepted through the student portal.

***Muscle Activation Techniques (MAT) Modules (Applies to all)
Under approved and documented extenuating circumstances, if a student cannot complete a module in the allotted timeframe, they may be allowed to move to the next scheduled module for a fee:
$499 fee for Specialist modules
$199 fee for Mastery modules
$75 fee for Specialist Refresher and Mastery Refresher modules

Muscle Activation Techniques (MAT)® Specialist & Mastery Workshops (Non-Credit, Short-Term)***
Tuition: $349 per workshop
(EACH WORKSHOP IS 1 DAY)
One-day live workshop refining your skillset at the specialist or mastery level.

Other Tuition and Fees
Tuition and lab fees are reviewed annually and changes are made effective each summer (July/August) term. Revised tuition rates are typically published in the school catalog six months in advance of the effective date.

Students are responsible for paying their quarter program cost. Most students use a combination of financial aid and make payments. Quarter payments are due twice a quarter and due dates are arranged through student accounts departments. There are no additional fees for making two payments. Scheduled payments that are more than five business days past due are subject to an account hold, which may limit the student’s ability to register. Students who fail to fulfill the financial arrangements agreed upon may be expelled from school and may re-enter only upon full payment of the delinquent portion of their account.

If a student repeats a course, he or she will be charged the tuition and fees in place at the time of the repeat. Students will be charged for overdue, lost or damaged library materials.

When applicable, student charges will include the appropriate sales tax payable based upon statutory rates. BVC offers a payment plan; see financial aid office for details.

Indirect Educational Expenses
The estimated room and board expense for a student living at home is $1,046 per month, with a transportation allowance of $254 per month.

The estimated room and board expense for a student living away from home is $1,425 per month, with a transportation allowance of $254 per month.
**Student Tuition Recovery Fund (STRF)**

The State of California established the Student Tuition Recovery Fund (STRF) to relieve or mitigate economic loss suffered by a student in an educational program at a qualifying institution, who is or was a California resident while enrolled, or was enrolled in a residency program, if the student enrolled in the institution, prepaid tuition, and suffered an economic loss. Unless relieved of the obligation to do so, you must pay the state-imposed assessment for the Fund STRF, or it must be paid on your behalf, if you are a student in an educational program, who is a California resident, or are enrolled in a residency program, and prepay all or part of your tuition.

You are not eligible for protection from the STRF and you are not required to pay the STRF assessment, if you are not a California resident, or are not enrolled in a residency program.

It is important that you keep copies of your enrollment agreement, financial aid documents, receipts, or any other information that documents the amount paid to the school. Questions regarding the STRF may be directed to the Bureau for Private Postsecondary Education, 1747 North Market Blvd., Suite 225, Sacramento, CA 95834, (916) 574-8900 or (888) 370-7589.

To be eligible for STRF, you must be a California resident or are enrolled in a residency program, prepaid tuition, paid or deemed to have paid the STRF assessment, and suffered an economic loss as a result of any of the following:

1. The institution, a location of the institution, or an educational program offered by the institution was closed or discontinued, and you did not choose to participate in a teach-out plan approved by the Bureau or did not complete a chosen teach-out plan approved by the Bureau.
2. You were enrolled at an institution or a location of the institution within the 120 day period before the closure of the institution or location of the institution, or were enrolled in an educational program within the 120 day period before the program was discontinued.
3. You were enrolled at an institution or a location of the institution more than 120 days before the closure of the institution or location of the institution, in an educational program offered by the institution as to which the Bureau determined there was a significant decline in the quality or value of the program more than 120 days before closure.
4. The institution has been ordered to pay a refund by the Bureau but has failed to do so.
5. The institution has failed to pay or reimburse loan proceeds under a federal student loan program as required by law, or has failed to pay or reimburse proceeds received by the institution in excess of tuition and other costs.
6. You have been awarded restitution, a refund, or other monetary award by an arbitrator or court, based on a violation of this chapter by an institution or representative of an institution, but have been unable to collect the award from the institution.
7. You sought legal counsel that resulted in the cancellation of one or more of your student loans and have an invoice for services rendered and evidence of the cancellation of the student loan or loans.

To qualify for STRF reimbursement, the application must be received within four (4) years from the date of the action or event that made the student eligible for recovery from STRF.

A student whose loan is revived by a loan holder or debt collector after a period of noncollection may, at any time, file a written application for recovery from STRF for the debt that would have otherwise been eligible for recovery. If it has been more than four (4) years since the action or event that made the student eligible, the student must have filed a written application for recovery within the original four (4) year period, unless the period has been extended by another act of law.

However, no claim can be paid to any student without a social security number or a taxpayer identification number.

**GENERAL INFORMATION**

**Class Content**

The institution reserves the right to make changes to improve the quality or content of the programs of study offered.

**Class Size**

Class sizes vary depending on a number of factors; however, a laboratory course will not have more than 30 students, Veterinary Technology laboratory courses average a size of 12 students, and a lecture course will not have more than 50 students.

**Class Schedules**

Day classes are scheduled between the hours of 7:45 a.m. and 5:30 p.m., Monday through Friday and (as required) Saturday. Evening classes are scheduled between 5:00 p.m. and 11:00 p.m., Monday through Friday, and (as required) Saturday. Online courses are available 24 hours per day on the Internet through the student portal.

A student may register in a degree or certificate program or in individual subject areas. Every effort is made to minimize conflicts between students’ personal and employment requirements and class schedules. However, the institution has the right to schedule the students’ class hours within the limitations of its facilities and overall enrollment.

**Course Cancellation**

The school reserves the right to cancel any class or program when enrollment is under fifteen students.

**Criminal Background Check**

A student who is entering and completing a career program should be aware that future employers may elect, or be required, to do background investigations on prospective employees to determine if any criminal records exist. This most frequently occurs when a prospective employee will be involved in “direct contact services” with clients or residents. Background checks may also be required for internships, externships, and practicums.

**Externship/Internship/Clinical Sites**

A site for a Massage Therapy or Veterinary Technology externship or clinical is generally provided within a fifty mile radius of the student’s home or home campus. A site outside of that radius may, depending on appropriateness and availability, be secured for the benefit of the student. Externship sites may vary by quarter. A list of previous externship sites will be available upon request.

Students are required to attend a pre-externship meeting in the quarter prior to the externship. The externship coordinator will notify students of the time and location of this meeting.

All externships must be completed during the normal business hours of the externship site, regardless of whether the student normally attends day and/or evening courses.

A student who is terminated from an externship will receive an F for the course and must come before an appeals committee before being placed on an externship again. Students who receive an F and are
successful in their appeal will also have to repeat and repay for the course. Students will not be permitted to attempt a third externship unless determined otherwise by school officials.

In the event of two failed attempts with no provision for a third attempt, the student will not be permitted to graduate nor receive a diploma/degree.

General Education
Broadview College integrates general education into all degree programs. The purpose is to engage and expose the student to the liberal arts disciplines, providing critical and analytical skills and intellectual knowledge that serve as a base for lifelong learning and allow the student to function as a well-informed global citizen.

General education courses provide students with the communication, problem solving, and analytical skills needed to perform many different jobs and provide solutions to our most important issues today.

In a world where change is constant, there is a perpetual need to learn new skills, acquire knowledge and gain qualifications on platforms that are relevant in today's technologically-driven marketplace. As such, general education courses at Broadview College are offered both residentially and in an online format. Students may have the opportunity to connect online and network with classmates from a wide range of backgrounds, programs, and locations. Please note not all courses are available in all locations or in both online and on-campus formats.

An associate of applied science degree program requires the student to earn a minimum of 30 general education quarter-hour credits, including three or more quarter-hour credits in each of the following four disciplines: communications, humanities, natural science and mathematics, and social science.

A bachelor's degree program requires the student to earn a minimum of 54 general education quarter-hour credits, including six or more quarter-hour credits in each of the following four disciplines: communications, humanities, natural science and mathematics, and social science.

The following are goals for each of the four general education disciplines:

Communications
Students will become effective communicators who apply the principles of communication in reading, writing, speaking, and listening.

Humanities
Students' knowledge of the human condition and human cultures will expand, especially in relation to behavior, ideas, and values expressed in works of human imagination and intellect.

Natural Science and Mathematics
Students will gain improved understanding of natural science principles and the methods of scientific inquiry; learn the vocabulary of science and realize the importance of ongoing scientific inquiry as a basis for lifelong learning; and increase their knowledge and application of mathematical and logical modes of thinking.

Social Science
Students will consider major ideas and historical events that shape society, including knowledge of the function of social, cultural, and political systems and the variability of human behavior.

Grievance Policy
It is important for each Student to be satisfied with the School's services. Part of achieving this satisfaction requires the quick and amicable resolution of any dispute between a Student and the School. The best way this can be accomplished is through informal discussion between the parties or by using the School's internal dispute resolution procedures. A student always has the right to contact the State office of higher education, the accrediting agency regulating the school, or the federal department of education to request assistance in resolving a dispute.

Broadview College has established the following policy and procedure to assist students with grievances:

1. A student is encouraged to make every attempt to resolve a grievance directly with the staff or faculty member involved.
2. If the student feels unable to resolve the difference in that way, the student may state the grievance to the department supervisor or campus administrator. A student who experiences a conflict or problem with an online instructor, and cannot resolve the grievance directly with the online instructor, can state the grievance to the campus administrator.
3. An appeal and/or grievance not resolved to the student’s satisfaction at that level may be submitted in writing to the campus director for resolution.
4. If resolution cannot be reached at this level, the student may submit an appeal to school ownership: Broadview Education Consortium 8147 Globe Drive, Suite 250, Woodbury, MN 55125 Phone: 651-432-4624

The issue will be resolved promptly and equitably.

Concerns may also be addressed to: Accrediting Council for Independent Colleges and Schools 1350 Eye Street NW, Suite 560, Washington, D.C. 20005 Phone: 202-336-6780 Fax: 202-789-1747

Broadview College students in Utah may also address concerns to: Utah Division of Consumer Protection 160 East 300 South, P.O. Box 146704, Salt Lake City, Utah 84114-6704 Phone: 801-530-6601

For copies of the complaint forms visit www.dcp.utah.gov

Students in California may also address concerns to: California Department of Consumer Affairs Consumer Information Center 1625 North Market Blvd., Suite N-112, Sacramento, California 95834 Phone: 833-942-1120 dca@dca.ca.gov

For copies of the complaint form visit: https://www.dca.ca.gov/consumers/complaints/oos_students.shtml

State Portal Entity Contacts through the National Council for State Authorization Reciprocity Agreements (NC-SARA) can be found at: https://www.nc-sara.org/content/state-portal-entity-contacts

If the institution is found to be in violation of state, federal, and/or accreditation regulations and a final judgment is rendered against the institution, the institution's accreditor may take an adverse action against the institution, its State authorization may be denied, suspended or revoked; and/or its Title IV participation may be limited, suspended, or terminated.
Guidance
The school provides academic and financial guidance for students in need of these services.

Health and Safety
Classrooms and laboratories comply with the requirements of the various federal, state, and local building codes and Board of Health and fire department regulations. In case of emergency, the school will obtain the services of medical professionals as required. However, Broadview College does not provide health care or counseling services to its students.

Health Insurance
Participating Veterinary Technology students are encouraged to carry their own health insurance coverage and are solely responsible for their own health care cost. The school does not provide health insurance coverage for its students and the school is not responsible for any medical expenses incurred by its students.

Independent Study
Under exceptional circumstances, a request to complete a required course through independent study may be granted. The method of course completion, including but not limited to, specific assignments, deadlines, and examination dates, will be under the supervision of a faculty member. Some courses may not be suitable for this format; graduate courses (500-level and above) are not offered in an independent study format. The circumstances under which independent study will be approved are very limited. A request must be approved by the dean of education, campus administrator or campus director and approval will be contingent on availability.

Name and State of Residence Changes
A student whose name has changed must provide the campus with a social security card showing the new name. This is required before any official records can be updated. Documents regarding the name change will be stored in secure financial aid documents. Please contact the campus if your state of residence has changed and provide the new address. A student who changes his or her state of residence to a state where the institution does not meet state requirements may be ineligible for Title IV and HEA funds. A change in state location may also impact eligibility for program licensure or certification requirements in the state.

Non-Discrimination Policy
Broadview Education Consortium institutions offer equal opportunities in all of their academic programs or activities without distinction or discrimination because of race, color, sex, religion, age, creed, gender identity, sexual orientation, national origin, ethnic origin, nationality, physical or mental disability, or veteran status.

In accordance with United States Department of Education Title IX of the Education Amendments of 1972, 29 U.S.C. §§ 1681 et seq. (Title IX) and its implementing regulations, 34 C.F.R. Part 106, Broadview College strictly prohibits discrimination on the basis of sex in any education programs or activities by students and employees of our campuses.

Additionally, in accordance with Title VI, Section 504, and the Age Discrimination Act, the following individuals are designated to handle inquiries regarding the non-discrimination policies:

*Angie Norbeck, Title IX Coordinator/Vice President of Academic Affairs*
Broadview College – Central Support Office
8147 Globe Drive, Suite 250, Woodbury, Minnesota 55125
651-447-8287 / anorbeck@broadviewuniversity.edu

Edward B. Rumsey, Director of Enrollment Services
303-844-5695 / 303-844-4303
Edward.B.Rumsey@ed.gov

Natalie Williams, Campus Director
Broadview College
1902 West 7800 South, West Jordan, Utah 84088
385-429-9134 / nwilliams@broadviewuniversity.edu

These individuals have been adequately trained and are responsible for investigating complaints of non-compliance. General procedures for the resolution of grievances can be found in the Grievance Policy section of this catalog. Grievances will be resolved promptly and equitably.

For further information on notice of non-discrimination see the information below for the office that serves your area, or call 1-800-421-3481.

Bullying
Broadview College regards bullying of others by employees or students as unacceptable behavior and is just cause for disciplinary action. A student who experiences bullying is encouraged to inform the dean of education or campus administrator and, if appropriate, register a complaint.

Sexual Harassment/Sexual Assault
Broadview College regards sexual harassment, including sexual assault, of others by employees or students as unacceptable behavior, which is just cause for disciplinary action. It is a violation of Section 703 of Title VII of the Civil Rights Act of 1964 as amended in 1972, the Utah Antidiscrimination Act, and Title IX of the Education Amendments, and is punishable under both federal and state laws.

Students who believe they have been sexually harassed should issue complaints to the individuals listed below and follow the procedures outlined in the Title IX Grievance Policy within the Campus Safety & Security Report located on our school website at: https://broadviewuniversity.edu/accreditation-consumer-info/

Angie Norbeck, Title IX Coordinator/Vice President of Academic Affairs
Broadview College – Central Support Office
8147 Globe Drive, Suite 250, Woodbury, Minnesota 55125
651-447-8287 / anorbeck@broadviewuniversity.edu

Natalie Williams, Campus Director
Broadview College
1902 West 7800 South, West Jordan, Utah 84088
385-429-9134 / nwilliams@broadviewuniversity.edu

Complaints shall remain confidential. If a complaint alleges facts that may constitute sexual harassment on-campus or during an off-campus school event or activity, the complainant and/or an individual on the behalf of the complainant must immediately contact the Title IX Coordinator or Campus Administrator for assistance.
The Title IX Coordinator and Campus Director shall have available the names and contact numbers of local law enforcement agencies to be called for immediate help, as appropriate.

**Office Hours**
Monday through Thursday: 9:00 a.m. – 5:30 p.m.
Friday: 9:00 a.m. – 4:00 p.m.

**Online Education**
Students enrolled at Broadview College, the Institute of Production and Recording and Minnesota School of Cosmetology have the option to earn credit for equivalent online courses and programs. Online courses are administered through a centralized, shared virtual learning environment, and delivered by campuses that are approved for online delivery.

This mode of delivery offers flexibility and convenience for busy students. Students can access course material within broad time frames that accommodate their schedules. Assignments and activities are conducted through chat, email, discussion boards, webinars, and online tutorials. Courses are divided into units, with assignments and learning activities required each week (see Attendance Requirements section of this catalog). Some courses may offer scheduled meeting times for live lectures and office hours. Students have secure login credentials to access the student learning management system, Blackboard. The student’s individual account is created at the time of enrollment. The student’s user ID and password are unique and specific to that student. Students have the ability to change their Blackboard password at any time, and only the student has access to the password.

Students who register for a distance education course must be the same student who participates in and completes the course for academic credit. Any student who acts dishonestly, including providing others with their Blackboard login credentials or submitting work or exams completed by others, will be required to meet with campus staff and may be subject to the following actions: A grade of zero for the work in question, a failing grade for the course, and/or expulsion from school. If a student wishes to appeal disciplinary actions such as these, they must follow the grievance policy found in this school catalog.

All first-time online students must successfully complete the Online Orientation within the student portal before starting their first online class. This orientation will teach students how to use all of the online learning tools within the student learning management system.

Blackboard is a comprehensive virtual campus that will allow students to access all of their online course and school resources in one convenient location. The online orientation will be facilitated by a centralized instructor who is available to assist students with completing the training successfully and preparing them to begin their first online class. Students will receive an email at their student email account with information on how to start the online orientation and all students should start the orientation course within 72 hours of receipt of their orientation invitation email.

A student registered for an online course is expected to log into the course within the first 72 hours (three days) of the quarter and log in and participate in the course at least once per week throughout the quarter. It is highly recommended that a student registered in an online course log in to his/her course at least three different days per week each week of the quarter.

Students should contact the following individuals for academic questions and contact the service desk for technical issues:

**Veterinary Technology & Massage Therapy Students:**
Crystal DeWeerd / 385-429-9138 / edeweerd@broadviewuniversity.edu

**MAT & Master of Science in Management Students:**
Meg Stephenson / 651-447-8251 / mstephenson@broadviewuniversity.edu

Service Desk / 651-968-4470 / BECServicedesk@broadviewuniversity.edu

In order to register for an online course, a student must, at a minimum, have consistent access to the Internet multiple times per week. Some online courses require certain software packages. It is highly recommended that students have their own computer equipped with the system requirements in order to succeed in online courses:

<table>
<thead>
<tr>
<th>Internet Connection</th>
<th>Broadband (cable or DSL) 10 Mbps minimum, 20 Mbps recommended</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hardware</td>
<td>Any computer purchased new within 2 years of your start date (computer, laptop, Surface)</td>
</tr>
<tr>
<td></td>
<td>Minimum Recommended Specs:</td>
</tr>
<tr>
<td></td>
<td>• Processor: Intel i3 or AMD A8</td>
</tr>
<tr>
<td></td>
<td>• Memory: 4GB or higher</td>
</tr>
<tr>
<td></td>
<td>• Storage: 64GB minimum with 20% free space</td>
</tr>
<tr>
<td></td>
<td>• Must be WiFi capable</td>
</tr>
<tr>
<td>Note:</td>
<td>Kindle Fire, generic tablet are not acceptable devices</td>
</tr>
<tr>
<td>Operating System</td>
<td>MS Office 2010 or higher (Microsoft Office Professional 2016 is required for some classes). Note: Current versions of MS Office are available to active students for Windows and Mac at no charge.</td>
</tr>
<tr>
<td>Software</td>
<td>Additional software may be required depending on the class, however, most of the required software is available for students within the student portal at no additional charge</td>
</tr>
<tr>
<td>Browser</td>
<td>We also recommend antivirus software and personal Firewall</td>
</tr>
<tr>
<td>Email Capabilities</td>
<td>An email account through the college email system is provided and required</td>
</tr>
<tr>
<td>Internet/Computer Access</td>
<td>Students who do not own a computer must have consistent access multiple times per week to a computer that meets these minimum requirements</td>
</tr>
</tbody>
</table>

**Refresher Courses**
Any graduate* of Broadview College may return and audit any previously completed course. A graduate who wishes to exercise this option should contact the dean of education or campus administrator at the campus. The graduate will be assigned to a class for auditing, tuition-free, on a space available basis. The student may attend the course for only the cost of books, fees, and/or supplies.

Additional costs for Veterinary Technology: Students are charged $5 per quarter to help offset costs the school incurs to cover students for professional liability coverage. The school does not provide health insurance coverage for students. Refer to the Health Insurance section of the catalog.

*Refresher courses are not applicable to courses or modules with a MAT course code.

**Schedule Changes, Withdrawals and Re-Entries**
Permission for a change in the program of study or class schedule must be obtained from the dean of education or campus administrator.

A student who wishes to withdraw from a program must notify the dean of education or campus administrator in advance of withdrawal.

A student who wishes to re-enter a program must contact the academic services department for an appointment.
**Student Course Load Policy**

In order to complete a degree in the standard time frame (one and one-half to two years for an associate degree and three years for a bachelor’s degree), a student must complete an average of 15 credits per quarter, based on attending four quarters a year. That course load may include credits earned in the following ways: at the student’s home campus, online, through attendance at a non-home campus or school for which a consortium agreement exists, and through externship/internship hours.

**Student Portal**

Students can view their email, final grades, financial aid information, student account information, library resources, make payments on their account, receive messages from school administration, access electronic forms, and much more, through the student portal. Final grades will be available to students at the end of each quarter. Students can access the student portal by going to studentsupportal.com.

**Students with Disabilities**

The Americans with Disabilities Act of 1990 and Section 504 of the Rehabilitation Act of 1973 guarantee students with disabling conditions equal access to educational opportunities. All students with physical or mental disabling conditions seeking academic adjustments and/or other modifications because of a disabling condition are eligible to receive academic adjustments in the educational environment and for participating in programs, services, and activities offered by Broadview Education Consortium member schools.

Academic adjustments and/or modifications include, but are not limited to, auxiliary aids, changes in the length of time permitted for the completion of degree requirements, substitution of specific courses required for the completion of degree requirements, adaptation of the manner in which specific courses are conducted, and/or modification of school policies and procedures. Broadview College is not required to make adjustments and/or modifications that are essential to the instruction being pursued or would fundamentally alter the nature of the service, program or activity, those that represent a personal service, or those that would result in a violation of accreditation or regulatory requirements.

A student wishing to request reasonable accommodation must submit a Disclosure of Disability and Request for Academic Adjustment to the dean of education or campus administrator at the student’s home campus, including acceptable documentation concerning the disability, so that reasonable accommodations can be made. Some important considerations follow:

1. Potential students requesting accommodations for the entrance assessment must complete the accommodations process prior to being granted such accommodation.
2. Accommodations are not granted on a retroactive basis. Academic work that has been submitted prior to a request cannot be resubmitted with the accommodations granted and will remain graded as originally submitted.
3. Applicants requesting accommodations must acknowledge that the school is afforded an appropriate amount of time to determine and secure reasonable accommodations. Accommodations that require the acquisition of equipment, software/hardware, or additional resources will require additional time to secure and will not be immediately available upon request.

It is the student’s responsibility to self-disclose a disabling condition and to request reasonable accommodation as soon as the student determines a need or desire for such accommodation. For more information about required documentation or to request academic adjustments, please contact the dean of education or campus administrator at your home campus.

**Termination by the Institution**

The institution reserves the right to terminate the enrollment of any student who engages in the following:

- Failure to maintain passing grades
- Tardiness or absences in excess of school policy
- Failure to pay a school financial account
- Destruction of or damage to any property of the school (the student may also be held liable for repair or replacement of the damaged property)
- Unlawful or improper conduct (including academic dishonesty)
- Conduct contrary to the best interest of the school or that reflects discredit upon the school
- Behavior disruptive of normal classroom conduct

**Transcripts**

An official transcript is issued to the student upon completion of his/her program. Additional copies of transcripts are available through the academic services department and through the school’s website. This service is subject to the Family Educational Rights and Privacy Act of 1974.

Transcripts issued by Broadview College will include the student’s coursework completed at Broadview College (formerly Broadview University) and any additional coursework completed at Globe University, Minnesota School of Business, the Institute of Production and Recording, Minnesota School of Cosmetology, and/or another institution, if applicable.

**ACADEMIC INFORMATION**

**Add/Drop Period**

The first five business days of each course session (and the first business day of the second week of the quarter for individual classes that meet for the first time on Saturday of the first week of the course) are designated as the “add/drop period” for schedule changes involving individual courses for both new and returning students. By the end of the five-day period, each individual’s schedule will be in place for the remainder of the course length. Individual courses dropped during this period will not appear on a student’s transcript and no tuition will be charged. Returning students who attend classes within the add/drop period and completely withdraw from school during the first week will be charged for the portion of the classes attended and receive a grade of W. Courses that a student has attended and dropped during this period will not appear on a student’s transcript. Tuition and applicable fees for the course will be charged to the student’s account.

**Attendance Requirements**

Students are expected to be present and on time for all residential class meetings. Broadview College does not distinguish types of absence. Instead, attendance is monitored for all class sessions and is recorded as actual time attended. Any time missed from a scheduled class is considered time absent. The student is responsible for notifying the academic services department of any absences. The student is also responsible for communicating with his/her instructor when absent from part or all of a class to determine missed assignments, due dates, and his/her eligibility for submitting missed class work.

A student registered for an online course is expected to log into the course within the first 72 hours (three days) of the quarter and...
participate (post discussion boards, complete quizzes, test, or assignments) in the course at least once per week throughout the quarter. Online courses require a high level of interaction and participation in the course environment. It is highly recommended that students registered in online courses log in to each course at least three different days a week each week of the quarter.

A student absent for ten consecutive business days from one or more courses will result in the administrative withdrawal from such course(s) and may lead to discontinuation of enrollment at BVC. In addition, 20 percent of the required contact hours missed from a course may lead to an inability to complete required course material and potentially withdrawn from the course.

Excessive absences may result in failure of the course(s) and may lead to discontinuation of enrollment at BVC. A student not in attendance by the end of the add/drop period may be dropped from all courses and withdrawn from school.

Regular and punctual attendance is a very important part of training for employment. Undergraduate student who achieves perfect attendance in a given quarter will receive a 25% discount off one merchandise item purchased the quarter following the student's achievement. Perfect attendance for residential courses is defined as being present for the full length of every class period for which the student is registered for the entire length of the quarter. Perfect attendance for online courses is defined as meeting the discussion board deadlines and expectations each week (Monday through Sunday), outlined in the Online Class Expectations of every online course. Perfect attendance for hybrid courses is defined as participating once a week in the online component of the course and present for the full length of every residential class session. The perfect attendance award will only be granted to students who are actively taking classes in the quarter immediately following the earning of the perfect attendance award. Students who take a quarter off will forego the perfect attendance discount.

Audit Policy
An audited course is one in which a student who is enrolled in a program and is actively taking classes is allowed to attend class and participate. The student is expected to fulfill the audit agreement as determined by the dean of education or campus administrator and is encouraged to participate fully in all aspects of the class. A student who wishes to audit a course must obtain permission from the dean of education or campus administrator and register for the course.

A student may not change a course registration from credit to audit after the add/drop period. A student auditing a course will be responsible for the cost of books and/or supplies and fees associated with the course. Any graduate of BVC may return and audit any previously completed course as a refresher (please see Refresher Courses in the General Information section of this catalog).

Conduct
A student must establish and maintain a record of good standing throughout the student's program. Good standing includes satisfactory attendance and academic performance as well as courteous personal behavior. Any conduct that disrupts the learning environment may result in permanent dismissal. The institution reserves the right to dismiss a student when personal conduct, attendance, or academic progress is considered to be unsatisfactory. The student will only be readmitted to school with the approval of the campus director and dean of education or campus administrator. Broadview College is committed to providing an open, diverse, and insightful learning environment in all of its residential and online courses.

Communication in the online course environment should at all times be professional, courteous, and respectful of the diversity of the community.

Academic Dishonesty
Academic dishonesty includes cheating on tests or assignments, turning in work completed by others, turning in the same work or portions of the same work for different courses without the prior approval of the instructors, providing false or misleading information to faculty or staff members, unauthorized collaboration on any academic work that is intended to be completed individually or plagiarizing. All work submitted must be in the student’s own words and must cite the source of the idea where applicable.

Students who act dishonestly may receive a zero or receive a failing grade for the course. Repeated or serious violations may result in termination of educational privileges. If a student wishes to appeal disciplinary actions such as these, he or she must follow the grievance policy found in this catalog.

Academic Freedom
Students are entitled to freedom in the classroom to engage in a range of activities involved in learning, but should be careful to avoid controversial matter that is unrelated to the subject.

Explicit Internet Content
Computers are located in public areas and, as such, material viewed is not private. Users must be considerate of other individuals using the public space and refrain from displaying materials that might reasonably be considered objectionable by others. In addition, the viewing of pornographic material may be grounds for sexual harassment charges by other users. Any such grievances will be investigated and resolved per the Broadview Education Consortium grievance policy in the Sexual Harassment/Sexual Assault section of this catalog. If use of the Internet becomes disruptive or objectionable, a librarian, staff, or faculty member may ask the offending user to leave and may result in permanent expulsion from school at any Broadview Education Consortium member campus.

Course Numbering
The following is a guideline for course numbers and sequencing:

- 00-99 Remedial coursework
- 100-149 Courses having no prerequisite and normally taken during the first quarter
- 150-199 Courses normally having prerequisites from the 100-149 level
- 200-249 Courses normally having prerequisites from the 150-199 level
- 250-299 Courses normally having prerequisites from the 200-249 level
- 300-499 Courses are upper-level and satisfy upper-level course requirements in bachelor’s degree programs
- 300-399 Courses normally having prerequisites from the 100-299 level
- 400-499 Courses normally having prerequisites from the 300-399 level
- 500-699 Courses normally at the graduate program level

Definitions of prerequisite, co-requisite, and concurrent:

- **Prerequisite:** Course must have been taken in a prior quarter
- **Co-requisite:** Course must be taken in the same quarter
- **Concurrent:** Course may be taken in the same quarter

Diploma/Degree
Upon successful completion of requirements for graduation, the school will award the appropriate diploma or degree.
Grade Levels
A student attending BVC will advance beyond freshman-grade level upon successful completion of 36 credits of training. Each additional 36 credits of successful training will represent advancement to the next grade level.

An undergraduate student taking 12 or more credits is full-time. An undergraduate student taking 9 to 11 credits is three-quarter time. An undergraduate student taking 6 to 8 credits is half-time. A Master’s student taking 6 or more credits is full-time; a Master’s student taking less than 6 credits is part-time.

Grading
The purpose of training at BVC is to prepare graduates for entry-level employment and success in their chosen careers. Grading is administered to correlate a student’s progress in terms related to employee proficiency expected by business and industry. Grading is based on daily performance in class and laboratory and the student’s level of achievement on tests, assignments, laboratory projects, and final exams. Final grade reports will be available to students at the end of each quarter.

A Excellent (4.0): Indicates a superior grasp of material as demonstrated by excellent performance on assignments and examinations, a strong predictor of career success.

AD Audit (0.0): Indicates that the student audited this course and received no credit for the course.

B Good (3.0): Indicates a good level of proficiency, a strong indication of career success.

C Satisfactory (2.0): Indicates a satisfactory level of achievement to enable successful employment or completion of further coursework.

D Unsatisfactory (1.0): Indicates a marginal level of achievement.

D* Unsatisfactory (0): Indicates unsatisfactory performance. A student earning a grade of a D* in any Veterinary Technology required course (see Program Specific Grading Requirements section) must repeat that course satisfactorily prior to graduation.

EC Experiential Credit (0): Indicates that a student has received credit for this course by successfully documenting professional work experience closely related to the defined coursework or prior learning received outside of the traditional classroom, equivalent to the academic content.

F Fail (0): Indicates unsatisfactory performance. A student earning a grade of F in any required course must repeat that course satisfactorily prior to graduation.

F* Fail: Indicates that a student has failed this course and, in a subsequent quarter, has retaken the course and successfully completed the requirements.

FL Fail: Indicates unsatisfactory performance in a pass/fail course. The student must repeat that course with a grade of pass prior to graduation.

FD Fail/Drop (0): Indicates that a student has dropped a class after the 75 percent completion point of the scheduled sessions for the class and failed to complete the requirements to earn a passing grade. The student must repeat any course required for graduation with a passing grade.

I Incomplete (0): Indicates that a student has not completed all work required for the course because of some unusual event. Incomplete work must be made up. An I grade may be given only with the approval of the instructor and the dean of education or campus director. Incomplete work must be submitted no later than the second Friday after the end of the quarter the grade was issued. If the incomplete grade is not resolved by this deadline, it will be changed to an F and will be included in the cumulative grade point average.

IC Incomplete due to Extenuating Circumstance (0): Indicates that a student has not completed all work required for the course because of an extenuating circumstance (e.g. COVID) and the student has been granted an extension. If the IC grade is not resolved within two quarters, the grade will be changed to an F and will be included in the cumulative grade point average.

NC Non-Credit (0.0): Indicates that a student completed a non-credit course and received no credit for the course.

P Proficiency through Advanced Standing: Indicates that the student has earned credits for this course by successfully demonstrating proficiency through advanced standing.

PL Prior Learning (0): Indicates that a student has received credit for this course by successfully documenting prior learning, received outside of the traditional classroom, equivalent to the academic content.

PS Pass: Indicates that the student has passed the course with a satisfactory level of achievement.

TC or TR Transfer Credits: Indicates that the student has earned transfer credits for this course at another institution or from another program of study at BVC.

W Withdrawal (0): Indicates that a student has withdrawn from the course prior to the 75 percent completion point of the scheduled sessions for the class.

WE Work Experience (0): Indicates that a student has received credit for this course by successfully documenting professional work experience closely related to the defined coursework.

WM Withdrawal for Military Duty (0): Indicates that a student has withdrawn from the course prior to 75 percent of the scheduled class meeting sessions due to military commitments.

Program Specific Grade Requirements
A grade of C or higher is required to pass courses in certain programs: AAS Veterinary Technology students must pass all VT courses and NS105 Biology with a grade of C or higher.

Graduation Requirements
In order to graduate, a student must attain an overall 2.0 cumulative grade point average, attain minimum skill requirements in the selected program, if applicable, and successfully complete all required courses in the program.

Maximum Timeframe or Required Completion Rate Evaluation (as part of Satisfactory Academic Progress)
The maximum timeframe/required completion rate allowed for a student to complete a program is one and one-half times the number of required credits for the program in which the student is enrolled. The maximum timeframe is calculated for each student and is reduced or increased to reflect course exemptions, transfer credits, the need for developmental courses, or changes in programs. A student is evaluated according to credit hours attempted versus credit hours completed.

In no case can a student, either as a regular student or in an extended enrollment status, exceed one and one-half times the standard timeframe as defined by the institution and receive the original academic credential for which he/she enrolled.

Honors
In order to stress the importance of academic performance, the institution awards academic honors recognition quarterly to qualifying students. A student must achieve a quarterly grade point average of 3.5 or above to achieve the honors recognition and a quarterly grade point average of 4.0 to achieve highest honors.

A student maintaining a cumulative grade point average of 3.5 or above will graduate with honors. A student maintaining a cumulative
grade point average of 4.0 will graduate with highest honors.

The institution also recognizes perfect attendance.

**Leave of Absence Policy**

Broadview College does not offer leaves of absence.

**Military Absence**

As an alternative to withdrawal for military duty, a student in the military will be allowed to choose an extension on coursework and exams for the time that the student is absent. The student must notify the campus academic services department and provide documentation including military orders or a letter of activation from the student’s military unit indicating the specific dates of service.

A student on active duty who encounters an extended mission of a sensitive nature is eligible for military absence. In this situation, the student needs to send an email and/or letter from his or her unit stating the student will be unavailable for a timeframe, but not the nature of the mission. Finally, a military student who successfully completed a sufficient amount of coursework before the military absence began may be issued a grade of incomplete or the grade that the student earned to that date.

In order to select the most appropriate option in light of a student’s academic needs, the student must contact the academic services department. Lack of notification may result in ineligibility to receive these provisions.

**Program/Curriculum Revisions**

The school reserves the right to vary the sequence of courses and to revise curriculum content to upgrade program material. A student who drops from school for one or more quarters will be required to re-enter the program under catalog requirements current at the time of re-entry. Prerequisites for certain courses may be waived with the approval of the dean of education or campus director.

**Military**

Degree requirements at the time of a service member’s enrollment will remain in effect for a period of at least one year beyond the program’s standard length provided the service member is in good academic standing and has been continuously enrolled. Service members may experience an adjustment to degree requirements as a result of a formal change to academic policy at least two years after the affected students have been notified or when courses or programs are no longer available or mandated state or accrediting body changes occurred. The school will identify low or no cost solutions for the service member that would not hinder the student from graduating in a timely manner.

**Re-Entry**

The definition of a re-entry student is any student who drops from school after the first week of his/her initial quarter. The student must be out of school for at least one quarter or until the next start date. A re-entry student will be treated as a continuing student for all academic and financial requirements. A student who drops from school for one or more quarters will be required to re-enter the program under current catalog requirements. A student may have only one reinstatement unless extenuating circumstances exist.

**Military Re-Entry**

A service member or reservist who is temporarily unable to attend class or have suspended their studies due to service requirements will be promptly readmitted. The student must notify the school verbally or in writing of their intent to return to school within three years after the completion period of service. The school will admit the student in the same academic status, including the same or similar program, enrollment status, number of credit hours, and academic standing. The student may choose a different program and enrollment status.

**Unit of Credit**

A quarter credit earned is defined as the successful completion of a minimum of 10 hours of lecture, 20 hours of lab or 30 hours of internship, externship, and practicum.

Students should expect required assignments outside of the classroom hours identified on this syllabus. This time is used to prepare for class, to reinforce material already presented, and to advance skills. For each lecture hour, two hours of outside work is expected.

**Withdrawal from School**

A student who withdraws from school after the fifth business day of the initial quarter will have all attended courses recorded on the student’s transcript, and will be charged for the time attended.

**Military Withdrawals**

A student called to active military duty, and as a result is unable to complete the current quarter, will receive a grade of WM, Withdrawal for Military Duty, for all currently registered courses upon the school’s receipt of duty orders. A full tuition refund will be applied to the student’s account for all courses for which the student is actively enrolled at the time of military activation. The student will be liable for any financial aid stipends received above the cost of tuition/fees/books for the quarter of enrollment.

**Withdrawals**

When a student withdraws from an individual course after the fifth business day of the quarter, the course will be recorded on the student’s transcript, and the student will be charged for the course.

**Late Course Withdrawal**

BVC understands there are times when extenuating circumstances occur that require reconsideration of the course withdrawal policy. If a student encounters mitigating circumstances after the last day to withdraw from a course with a grade of W, the student is encouraged to submit a written appeal to the dean of education or campus administrator. An appeal committee will determine whether the deadline will be waived, allowing the application of a W grade, or if the student will be held to the deadline. All decisions made by the committee are final.

**SATISFACTORY ACADEMIC PROGRESS**

**BVC Satisfactory Academic Progress Policy**

Federal regulations require the academic services and financial aid departments to monitor the academic progress of all active students toward the completion of their program of study. This monitoring process is called Satisfactory Academic Progress (SAP). The complete academic record of a student’s current program is considered regardless of whether financial aid was received. In addition, BVC calculates Satisfactory Academic Progress for non-degree students in the area of cumulative grade point average and completion rate.

Academic progress is evaluated each quarter using three factors: grade point average, percentage of attempted credits completed and maximum number of credits allowed. Failure to maintain satisfactory academic progress may result in cancellation of eligibility to receive Federal Title IV funding, institution-based scholarships or other financial aid.
**SAP Requirements**

In order to be making satisfactory progress, a student must meet all of the following requirements:

1. Achieve the cumulative grade point average (CGPA) required at each evaluation point.
2. Maintain a 67 percent cumulative completion rate. Completion Rate (CMFT%) is calculated as:
   
   \[
   \text{all successfully completed credits} \times 100 \\
   \text{all attempted credits}
   \]

3. Complete all program requirements within the maximum timeframe/maximum credits, which is 150 percent of the minimum number of credits required to graduate. For example, if a program requires 100 credits, the student may attempt a maximum of 150 credits.

The school will expel a student at the point that it is determined that the student will not be able to complete the program within the 150% maximum timeframe.

*Only credits of courses that may be applied to the student's current program of enrollment will be considered in the above equation.

**How Courses are Counted**

Successful completion of a course of study requires a grade of A, B, C, D or PS. Grades of F, D*, I, W, FL, and FD do not constitute successful completion of a course. See below for detailed information about the effect of grades on Satisfactory Academic Progress.

**Grades of A, B, C and D Earned in Broadview College Courses**

Courses with grades of A, B, C and D count as credits attempted and completed. These grades count toward the CGPA as follows:

\[
A = 4.0, \quad B = 3.0, \quad C = 2.0 \quad \text{and} \quad D = 1.0.
\]

**Grades of D* and F Earned in Broadview College Courses**

Courses with grades of D*, FD and F count as credits attempted, but not completed and count toward the CGPA as 0 points.

If a course is repeated, only the most recent grade counts toward the CGPA. A course may only be attempted three times.

**Pass/Fail Courses**

Courses with a grade of PS count as credits attempted and completed. The course does not count toward the CGPA.

Courses with a grade of FL count as credits attempted but not completed and do not count toward the CGPA.

**Dropped Courses and Course Repeats**

Individual courses dropped during the first five business days of the quarter, with the exception of courses a student is scheduled to begin on the first Saturday of the quarter, are deleted from the student’s record and therefore do not count toward any SAP calculation. Individual courses that begin on the first Saturday of a quarter and are dropped on or before the first business day after the first Saturday of the courses are deleted from the student’s record and therefore do not count toward any SAP calculation.

If a course is dropped after the fifth business day of the quarter, or in the case of courses beginning on the first Saturday of the quarter, on the first business day after the first Saturday of the course, but before the end of the seventy-five percent mark of a class, it counts as a withdrawal. Courses dropped after the ninth week will be issued a grade of F. If a course is repeated, only the most recent grade counts toward the CGPA; however, both courses will count as attempts and will be considered in the completion rate calculation. Courses dropped due to military commitments will not be considered in the completion rate calculation.

**Incomplete Courses**

Courses with grades of I, IC, and W are not complete and therefore do not count toward the CGPA, but are considered in calculating completion rate.

If a student has an incomplete course at the time of the SAP calculation, the credits are counted as attempted, but not completed. An incomplete is not counted toward the CGPA. Whenever a student’s grade of incomplete is changed to a letter grade, SAP is recalculated for that student with the final grade being replaced in the SAP calculation.

**Course Repeats**

If a course is repeated, only the most recent grade counts toward the CGPA. If a student drops an individual course during the add/drop period (first five business days of the quarter or as described for Saturday courses in the Dropped Courses and Course Repeats section), the course does not count as an attempt. If a student is still enrolled in the course when the add/drop period ends, the course will count as an attempt and will be considered in the completion rate, even if the student subsequently withdraws from the course. Students have three attempts at a course. Grades of W, D* and/or F count as credits attempted.

**Transfer, Test-Out, Prior Learning, Audit and Work Experience Credit (Non-Punitive Grades)**

Transfer (TC or TR) credits count towards credits attempted and completed, and are not factored into the CGPA. Transfer credits will count in the 150 percent timeframe calculation.

Advanced standing (P) credits, prior learning (EC or PL) credits, audit (AD) credits and work experience (EC or WE) credits count towards credits attempted and credits completed, and are not factored into the CGPA.

**Change in Program**

If a student changes programs, all courses that can be applied to the new program are used in all SAP calculations (CGPA, completion rate and maximum timeframe), including courses with grades of D*, W or F. Courses that are not in the new program are excluded from all SAP calculations. A determination of courses that may be included in the new program as electives will be made in consultation with the dean of education or campus administrator. A grade of D* will be changed to a D for courses that will count towards a program outside of Veterinary Technology. A grade of D will be changed to a D* for courses that will count towards the Veterinary Technology program (see Grading and Program Specific Grading Requirements sections).

**Additional Degrees**

If a student earns a credential at BVC and enrolls in another program for an additional credential, all courses that have been successfully completed and can be applied to the new program are used in all SAP calculations (CGPA, completion rate and maximum timeframe/maximum credits). Courses that are not in the new program, including courses with grades of D*, W or F, are excluded from all SAP calculations. A grade of D* will be changed to a D for courses that will count towards a program outside of Veterinary Technology.
A grade of D will be changed to a D* for courses that will count towards the Veterinary Technology program (see Grading and Program Specific Grade Requirements sections).

**Non-Credit/Remedial Courses**
A student not seeking an academic credential will be measured by SAP. Lab (remedial) courses may be required as part of the student’s program based on the student’s placement test score. The foundational courses will then be included in both the qualitative and quantitative calculations, with the overall program credit requirements increasing to reflect the lab course(s).

**Evaluation Points and Standards**
A student in active status is evaluated at the end of each quarter. The following evaluation standards are based on maximum program length and credits attempted. The maximum program length is 150 percent of the total credits required for program completion. All applicable courses attempted are included in this evaluation measurement.

</table>

Any time a student is unable to complete a program within the maximum timeframe/maximum credits allowed, or to meet the minimum grade point average required to graduate, the student will lose financial aid eligibility and will be expelled from school.

Individual program standards tables listing all evaluation points, expected minimum qualitative and quantitative standards, and the results if those standards are not met, are available in the academic services offices.

End of first academic year is defined as 36 credits. On subsequent evaluations, this standard will increase and must meet a minimum of 2.0 CGPA and 67 percent completion rate by the time the student reaches any of the following:

1. Credits equivalent to two academic years = 72
2. Credits equivalent to three academic years = 108
3. Credits equivalent to four academic years = 144
4. The maximum allowable credit attempts for the program
5. Sufficient credits completed to graduate

**Students Not Meeting SAP Requirements**
Students in active status are monitored at the end of every quarter based on the evaluation standards above to help ensure successful progression from one evaluation point to the next. A student who is not meeting SAP requirements will be given an academic alert, placed on warning, expelled from financial aid or terminated from school, as follows:

**Academic Alert**
A student who has met the warning evaluation point but fails to meet either a 2.0 CGPA or 67 percent completion rate during any quarter will be placed on Academic Alert (see Evaluation Points and Standards chart). The student will receive written notification within ten business days of the end of the quarter when an academic alert is issued. The academic alert notice will also inform the student of resources available for assistance through the academic and student services departments. Additional support services will be discussed as necessary. During the quarter the student is placed on academic alert, he or she will be eligible to receive financial aid.

**Warning**
A student who does not meet the indicated standard(s) at a required evaluation point that prescribes Warning as a result will be placed on Academic Warning (see Evaluation Points and Standards chart). A warning notice will be distributed within ten business days of the end of the quarter. The warning notice will also inform the student what GPA the student must achieve and the number of credits the student must successfully complete by the end of the warning quarter in order to meet the minimum requirements by the next evaluation point. The student will only be granted one quarter of warning status. The student will be expected to meet with the academic services department to ensure the student understands the application of satisfactory academic progress standards, and must sign a consultation form to verify that understanding. A student will only be allowed one quarter on warning status. At the end of this paragraph: A student who does not meet the minimum requirements by the next evaluation point will be expelled.

**Expulsion**
A student who, at an evaluation point that requires Expulsion (see Evaluation Points and Standards chart), does not achieve the minimum requirements will be expelled from school and financial aid. The student will be notified in writing of the expulsion within ten business days of the end of the quarter. It is recommended that the student meet with the dean of education/campus administrator to ensure the student understands the application of satisfactory academic progress standards and sign a consultation form to verify that understanding. Additional support services will be discussed as necessary.

**Financial Aid Expulsion - Extended Enrollment Status**
An expelled student may request to enter extended enrollment status for one quarter to retake courses in order to meet SAP requirements. A student in extended enrollment status will be charged full tuition and fees and will not be eligible to receive financial aid.

If the student has not met the minimum requirements for the evaluation point at the end of the extended enrollment quarter, the student will remain in extended enrollment status, provided the student has earned a minimum quarter grade point average of at least 2.0 and a quarter completion rate of at least 67 percent.

A course taken while a student is in extended enrollment status will count as credits attempted in the completion rate calculation and the grade for the repeated course will replace the previous course grade in the CGPA calculation. The student will remain expelled from financial aid until meeting the minimum requirements specified for the next quarter.
In no case can a student exceed the maximum timeframe/maximum credit limit (150 percent of program length) either as a regular student or in an extended enrollment status and receive the original credential for which enrolled.

**Reinstatement**
A student who meets SAP requirements during the extended enrollment period will be reinstated as a regular student and will be eligible to receive financial aid.

**Appeals and Mitigating Circumstances**
A student who disagrees with the application of Satisfactory Academic Progress standards, or feels that there are mitigating circumstances may appeal in writing to the dean of education or campus administrator. The appeal must be filed within two weeks after the student is placed on warning or financial aid expulsion.

A campus and corporate appeals committee will determine if the appeal is warranted. Mitigating circumstances must consist of personal injury, poor health, family or other unusual and significant occurrences outside the control of the student. Mitigating circumstances must be documented, and the student must demonstrate that such circumstances had an adverse impact on the student’s satisfactory academic progress in the academic program. No waivers will be granted for graduation requirements.

A student who is granted an appeal for mitigating circumstances will be placed on Probation and will sign a consultation form stating the academic plan that must be met in order to remain in school. The student will be eligible for financial aid as long as the conditions on the consultation form are met. Enrollment of a student who fails to meet those conditions will be expelled.

**Program Transfer**
A student interested in transferring between programs may do so a maximum of two times, or at the discretion of the dean of education or campus administrator. A student must be meeting Satisfactory Academic Progress requirements to be eligible for a program transfer. Only courses that may be applied toward the new program will be transferred and counted in SAP calculations. A student transferring between programs must complete a status change form with the academic services department.

**Graduation Requirement**
In order to graduate, a student must attain a 2.0 cumulative grade point average and complete all program requirements within 150 percent of the maximum time frame/maximum credits.

**STUDENT SERVICES**

**Employment Assistance**
The institution offers employment assistance to its students and graduates; however, the school does not guarantee employment.

To ensure students are receiving the most benefit from the available campus resources, we encourage all students to meet with career services staff early in their programs and maintain contact throughout their education. This will increase their chances for securing employment in their chosen career field.

Students are advised of employment opportunities and are offered suggestions on preparing professional quality materials associated with their job search. Students should feel free to consult the career services department for advice on networking and interviewing skills.

In order to continue to supply employers with qualified graduates and to maintain the effectiveness of our training, surveys of graduates and employers of record are sent out after graduation.

The career services department will release information specific to a student or graduate’s career search when the student or graduate has granted consent to release information to potential employers. For more information about the release of records, review the Family Educational Rights and Privacy Act section of this catalog.

In addition, graduates and employers are encouraged, when appropriate, to serve on program-specific advisory boards that perform program evaluations and make recommendations for maintaining programs that meet industry requirements.

**Professional Licensure**
Licensure requirements vary from state to state and are subject to change. If you are considering enrolling in a program or module with Broadview College (BVC) that leads to professional licensure, we highly recommend that you contact the appropriate state licensing agency in your state or the state where you intend to work to seek the most up-to-date information about state licensure requirements prior to, and during, enrollment. The U.S. Department of Labor has provided this resourceful website: License Finder. If you would like assistance in finding your state’s licensure requirements, please contact your program chair or campus staff at BVC.

**International Compliance**
While Broadview College is in the process of tracking issues related to international authorization and licensure, it is the student’s responsibility to understand requirements on whether a degree or certificate will be recognized in a country outside of the United States, how the collection of student data may be used in another country, and whether you will be subject to additional withholding of taxes, in addition to the price of tuition. International students considering a program or module that leads to professional licensure should confirm with the appropriate professional licensing board in their country of residence, or the country where they intend to work, as to whether a BVC degree or certificate will be recognized when seeking licensure or certification.

**Programs**

The Bachelor of Science in Muscle Activation Techniques® program does not lead to professional licensure in Utah or any other state. At this time, there is not a recognized state licensure for muscle activation techniques. Please refer to the B.S. Muscle Activation Techniques® program page in this catalog for further information on entrance requirements, certification and/or licensure eligibility.

The Associate of Applied Science in Muscle Activation Techniques® program does not lead to professional licensure in Utah or any other state. At this time, there is not a recognized state licensure for muscle activation techniques. Please refer to the A.A.S. Muscle Activation Techniques® program page in this catalog for further information on entrance requirements, certification and/or licensure eligibility.

The Associate of Applied Science in Veterinary Technology program can lead to licensure, certification or registration depending on state regulations, and upon passing the Veterinary Technician National Examination (VTNE). The veterinary technology program does lead to state certification in the state of Utah, as a certified veterinary technician (CVT) upon graduation and passing the VTNE. Relocating could impact whether you meet licensure requirements, if applicable, in another state or territory. For state and territory requirements, please visit the Regulated and Non-Regulated Jurisdiction Reference List or visit the regulatory agency page on the American Association of Veterinary State Boards (AAVSB) website https://www.aavsb.org/public-resources/find-regulatory-board.
The Certificate in Muscle Activation Techniques® program does not lead to professional licensure in Utah or any other state. At this time, there is not a recognized state licensure for muscle activation techniques. Please refer to the Certificate in Muscle Activation Techniques® program page in this catalog for further information on entrance requirements, certification and/or licensure eligibility.

The Certificate in Massage Therapy program does lead to professional licensure, upon passing the MBLEx licensing exam offered by the Federation of State Massage Therapy Board (FSMTB). Licensure is required to practice massage therapy in the state of Utah. The certificate in massage therapy program meets Utah licensure requirements. Relocating could impact whether you meet licensure requirements in another state or territory. For state and territory requirements, please visit the state regulations page on the FSMTB website: https://www.fsmtb.org/consumer-information/regulated-states/ or visit our website for a list of each state’s licensing agency and requirements: https://broadviewuniversity.edu/accreditation-consumer-info/

The MAT® Modules do not lead to professional licensure in Utah or any other state. At this time, there is not a recognized state licensure for muscle activation techniques. Please refer to the non-credit, short-term module pages in this catalog for further information on entrance requirements, certification and/or licensure eligibility for each module.

Tutoring
Every effort will be made to find a tutor for a student who has shown adequate attendance in a course for which a tutor has been requested. Tutors are instructor-recommended students who provide assistance to classmates in one-on-one or group meetings. Students should know that there is no guarantee that tutors will always be available.

Family Educational Rights and Privacy Act (FERPA)
The Family Educational Rights and Privacy Act (FERPA) afford students certain rights with respect to their education records. These rights include:

1. The right to inspect and review the student’s education records within 45 days of the day the institution receives a request for access. The student, or in the case of the student being a minor, the parent, should submit to the registrar, academic services department, or other appropriate official, written requests that identify the record(s) they wish to inspect. The institution will make arrangements for access and notify the student of the time and place where the records may be inspected.

2. The right to request amendment of the student’s education records that the student believes are inaccurate or misleading. When asking the institution to amend a record that the student believes is inaccurate or misleading, the student should write the campus director, clearly identify the part of the record the student wants changed and specify why it is inaccurate or misleading. If the institution decides not to amend the record as requested by the student, the institution will notify the student of the decision and advise the student of his or her right to a hearing regarding the request for amendment. Additional information regarding hearing procedures will be provided to the student along with notification of the right to a hearing.

3. The right to consent to disclosures of personally identifiable information contained in the student’s education records, except to the extent that FERPA authorizes disclosure without consent. Exceptions to consent of disclosure include the following:
   - Disclosure to officials with legitimate educational interests: A school official is a person employed by the institution in an administrative, supervisory, academic, research or support staff position; a person or company with whom the institution has contracted (such as an accrediting body, attorney, auditor, or collection agent); or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility.
   - Disclosure, without the written consent or knowledge of the student or parent, of personally identifiable information from the student’s education records to the Attorney General of the United States or to the Attorney General’s designee in response to an ex parte order in connection with the investigation or proceeding of terrorism crimes specified in sections 2332b(g)(5)(B) and 2331 of title 18, U.S. Code. The institution is not required to record the disclosure of such information in the student’s file. Further, if the institution has provided this information in good faith in compliance with an ex parte order issued under the amendment, it is not liable to any person for the disclosure of information.
   - Disclosure, without the written consent or knowledge of the student or parent, of information from a student’s education records in order to comply with a lawfully issued subpoena or court order in the following three contexts:
     - Grand Jury Subpoena: The institution may disclose education records to the entity or persons designated in a federal grand jury subpoena. In addition, the court may order the institution not to disclose to anyone the existence or context of the subpoena or the institution’s response.
     - Law Enforcement Subpoena: The institution may disclose education records to the entity or persons designated in any other subpoena issued for a law enforcement purpose. As with federal grand jury subpoenas, the issuing court or agency may, for good cause shown, order the institution not to disclose to anyone the existence or contents of the subpoena or the institution’s response. Notification requirements and recordation requirements do not apply.
     - All Other Subpoenas: The institution may disclose information pursuant to any other court order or lawfully issued subpoena only if the school makes a reasonable effort to notify the parent or eligible student of the order or subpoena in advance of compliance, so that the parent or student may seek protective action. The institution will record all requests for information from a standard court order or subpoena.
   - Disclosure, without the written consent or knowledge of the student or parent, of information in education records to “appropriate parties in connection with an emergency, if knowledge of the information is necessary to protect the health and safety of the student or other individuals.” Imminent danger to student or others must be present.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the college to comply with the requirements of FERPA. The name and address of the office that administers FERPA is Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue Southwest, Washington, D.C. 20202-4605.
Directory Information

Directory information is that information which may be unconditionally released without the consent of the student unless the student has specifically requested that the information not be released. The institution requires that such requests be made in writing to the campus director within 15 days after the student starts classes.

The following items are maintained in all student files:

- Information to support evidence of admissions requirements, including entrance or placement examination test scores; attestation statement; evidence of having received information on hepatitis A, B and C; signed enrollment agreement; and evidence of a personal interview with admissions.

- Any test-outs, transcripts and/or supporting documents to support the application of transfer credits, prior learning assessment and/or advanced standing credit.

- Any status change forms to support a change from the original enrollment agreement and/or to indicate date and reason of completion or termination of active student status.

- Registration forms where applicable.

- Other information pertinent to the student’s education, contact information and permanent student file.

- Student financial aid documents including ISIR, FAFSA, school application and promissory notes.

- All verification documentation (taxes, worksheets, earnings records, etc.), professional judgment materials, student authorizations, scholarship applications, entrance and exit documents and/or materials to support fund source payments.

- Record of any student grievance and subsequent resolution.

- After a period of six years from the student's last date of attendance, the file may be purged. The following information will be electronically maintained indefinitely:
  - Student transcript (showing dates of attendance and all grades received)
  - Student ledger card (showing all charges and payments made by or on behalf of the student)

Directory information includes the student’s name, date of birth, address and email address; course of study; extracurricular activities; degrees and awards received; last school attended; dean’s list or equivalent; attendance status (full-time or part-time); and dates of attendance (the period of time a student attends or attended the college not to include specific daily records of attendance).

A student may restrict the release of directory information except to school officials with legitimate educational interests and others as outlined above. To do so, the student must make the request in writing to “Registrar” at the student’s home campus: Broadview College, 1902 West 7800 South, West Jordan, UT 84088.

Once filed, this becomes a permanent part of the student’s record until the student, in writing, instructs the institution to remove the request.
OBJECTIVES

The objective of the Muscle Activation Techniques® bachelor program is to provide understanding of the MAT® skillset to students who have knowledge in the health and fitness field. This program is a comprehensive and intensive study of the muscular system. Students will gain an in-depth level of knowledge of muscle function. The program studies the MAT® approach to advanced assessment and correction of muscular imbalances in the human body. Students are trained on the MAT® tools used to identify restrictions in joint instability relating to muscle tightness and weakness. Students develop an advanced level of the unique systematic format provided through Muscle Activation Techniques® in order to address muscle dysfunction and improve overall health and human performance.

Advanced management courses provide skills necessary for career placement and advancement. General education requirements in the areas of communication, social science, natural science and humanities provide analytical and communication skills as well as a global perspective of diverse cultures.

The goal of this program is to prepare graduates who are able to:

1. Understand the muscular system through assessment of muscle function relating to muscle weakness.
2. Learn an advanced assessment process to identify limitations in range of motion.
3. Demonstrate an understanding on how isolated weaknesses affect the integrated muscular system.
4. Master the practical application of palpation techniques designed to improve the neural integrity of inhibited muscles.
5. Gain advanced techniques to thoroughly assess and address muscular dysfunction.
6. Assess and apply business/health concepts to effectively demonstrate planning, evaluation, analysis, and presentation of goals and objectives.
7. Develop and execute a project plan.
8. Develop strategies to make ethical decisions in the workplace.
9. Demonstrate appropriate written and verbal communication skills.
10. Evaluate the quality of multiple viewpoints, arguments and evidence, and distinguish between fact and opinion.
11. Exhibit social responsibility and examine the diverse cultures and value systems of our global community.

CAREER OPPORTUNITIES: Graduates from the Bachelor of Science in Muscle Activation Techniques® will be prepared for employment in the field of health and fitness; such as a fitness trainer or fitness specialist.

NOTES

- Students must be a licensed therapist or must hold a recognized fitness certification with a minimum of two years of experience as a fitness professional. Students who obtain undergraduate coursework in Anatomy and Physiology or advanced placement by examination will also be considered for acceptance.
- MAT® courses do not teach students techniques designed to diagnose or treat injuries.
- All MAT® courses are conducted online and require exam prep and certification exams. Students will be required to travel throughout the program to the MAT® World Headquarters in Denver, CO to complete exam prep and certification exams.
- A minimum of eight students are required to run each of the MAT® courses. If enrollment for a course is below eight students, courses may be delayed until enrollment has reached the minimum number of students.
- Students in the program will be required to test for MAT® certification at the MAT® World Headquarters. Exam re-takes require individuals to arrange additional travel at their own expense.
- MAT® courses are not available to audit.
- Some institutional scholarships may not apply to the MAT® programs.
- Students are prepared for the MAT® Specialist and Master certification exams. Acceptance and successful progression through the Muscle Activation Techniques® program does not ensure certification or licensure eligibility. Licensure requirements are determined within cities, counties, municipalities, and states and students need to research local requirements to ensure compliance. At the time of publication, there is not a recognized state licensure for muscle activation techniques. State licensure of professions such as physical therapy, massage therapy and others may impact the techniques allowed by MAT® Practitioners in working with clients. Licensure rules are subject to change.

**OBJECTIVES**

Acceptance and successful progression through the Muscle Activation Techniques® program does not ensure certification or licensure eligibility. Licensure requirements are determined within cities, counties, municipalities, and states and students need to research local requirements to ensure compliance. At the time of publication, there is not a recognized state licensure for muscle activation techniques. State licensure of professions such as physical therapy, massage therapy and others may impact the techniques allowed by MAT® Practitioners in working with clients. Licensure rules are subject to change.

**TECHNICAL ELECTIVES**

Students will select a minimum of 32 credits as approved by the academic Department. Students may choose 32 credits from the following list:

Total General Education Minimum Credit Requirement 54

Total Program Minimum Credit Requirement 180

NOTES

- Students are required to complete 30 percent of the program at the 300/400 level.
- Students may be required to complete NS070 Algebra 116 Lab as a co-requisite to NS116 College Algebra and/or CM070 Writing 121 Lab as a co-requisite to CM121 Composition based upon competency exam scores.
OBJECTIVES

The objective of the Associate of Applied Science in Muscle Activation Techniques® degree program is to provide understanding of the MAT® skillset to students who have knowledge in the health and fitness field. This program enhances a student’s current competencies related to the human body and muscle function. The program studies the MAT® approach to assessment and correction of muscular imbalances in the human body. Students are trained on the MAT® tools used to identify restrictions in joint instability relating to muscle tightness and weakness. Students gain an understanding of the unique systematic format provided through Muscle Activation Techniques® in order for them to help their clients function with maximum efficiency and balance out the muscular system. General education requirements in the areas of communication, social science, natural science, and humanities provide analytical and communication skills, as well as a global perspective of diverse cultures. At the completion of this program, including passing of all certification exams, students will be awarded the credential of certified MAT® Specialist.

The goal of this program is to prepare graduates who are able to:

1. Understand the muscular system through assessment of muscle function relating to muscle weakness.
2. Examine and understand range of motion limitations in relation to potential muscle weakness.
3. Demonstrate an understanding on how isolated weaknesses affect the integrated muscular system.
4. Master the practical application of palpation techniques designed to improve the neural integrity of inhibited muscles.
5. Gain the skills to thoroughly address the mechanical imbalances and how they affect overall health and performance.
6. Assess and apply business/health concepts to effectively demonstrate planning, evaluation, analysis, and presentation of goals and objectives.
7. Demonstrate appropriate written and verbal communication skills.
8. Evaluate the quality of multiple viewpoints, arguments and evidence and distinguish between fact and opinion.
9. Exhibit social responsibility and examine the diverse cultures and value systems of our global community.

CAREER OPPORTUNITIES: Graduates of the Associate of Applied Science in Muscle Activation Techniques® will be prepared for entry-level employment in the field of health and fitness; such as fitness trainer or fitness specialist.

GENERAL EDUCATION REQUIREMENTS

A student pursuing an associate degree is required to earn a minimum of 30 credits from the general education courses listed below, demonstrating a solid grounding in the liberal arts. A minimum of three credits must be earned in each of the following disciplines: communications, humanities, natural science and mathematics, and social science.

NOTES

- Students must be a licensed therapist or must hold a recognized fitness certification with a minimum of two years of experience as a fitness professional. Students who obtain undergraduate coursework in Anatomy and Physiology or advanced placement by examination will also be considered for acceptance.
- All MAT® courses are conducted online and require exam preps and certification exams. Students will be required to travel throughout the program to the MAT® World Headquarters in Denver, CO to complete exam preps and certification exams.
- A minimum of eight students are required to run each of the MAT® courses. If enrollment for a course is below eight students, courses may be delayed until enrollment has reached the minimum number of students.
- Students in the program will be required to test for MAT® certification at the MAT® World Headquarters. Exam re-takes require individuals to arrange additional travel at their own expense.
- MAT® courses are not available to audit.
- Some institutional scholarships may not apply to the MAT® programs.
- Students may be required to complete NS070 Algebra 116 Lab as a corequisite to NS116 College Algebra and/or CM070 Writing 121 Lab as a co-requisite to CM121 Composition based upon competency exam scores.
- Students are prepared for the MAT® Specialist certification exam. Acceptance and successful progression through the Muscle Activation Techniques® program does not ensure certification or licensure eligibility. Licensure requirements are determined within cities, counties, municipalities, and states and students need to research local requirements to ensure compliance. At the time of publication, there is not a recognized state licensure for muscle activation techniques. State licensure of professions such as physical therapy, massage therapy and others may impact the techniques allowed by MAT® Practitioners in working with clients. Licensure rules are subject to change.

Total Core Minimum Credit Requirement 60

Total General Education Minimum Credit Requirement 30

Total Program Minimum Credit Requirement 90
ASSOCIATE OF APPLIED SCIENCE IN VETERINARY TECHNOLOGY

This program is offered residentially.

OBJECTIVES

The objective of the Associate of Applied Science in Veterinary Technology degree program is to provide the student with skills for employment as an entry-level veterinary technician. Students will be challenged by instructors to learn and apply skills as required by Committee on Veterinary Technician Education and Activities (CVTEA) in nine areas, which include pharmacology, nursing, anesthesia, surgical nursing, laboratory procedures and imaging. Students also will be prepared for the nine domains tested on the Veterinary Technician National Examination (VTNE). General education requirements in the areas of communication, social science, natural science, and humanities provide analytical and communication skills, as well as a global perspective of diverse cultures.

The goal of this program is to prepare graduates who are able to:

1. Demonstrate proficiency in essential veterinary technology skills.
2. Demonstrate comprehension in the following veterinary areas: pharmacy & pharmacology, surgical nursing, dentistry, laboratory procedures, animal care and nursing, diagnostic imaging, anesthesia, emergency medicine/critical care, pain management/analgesia
3. Record patient medical information using appropriate veterinary medical terminology.
4. Differentiate between normal and abnormal physical status in common animal species and take appropriate corrective measures where indicated.
5. Accurately calculate, dispense, and explain dosages of medications.
6. Use appropriate professional behavior in the clinical setting.
7. Explain preventive medicine concepts to clients in both written and verbal formats.
8. Evaluate the quality of multiple viewpoints, arguments, and evidence and distinguish between fact and opinion.
9. Exhibit social responsibility and examine the diverse cultures and value systems of our global community.

CAREER OPPORTUNITIES: Graduates from the Associate of Applied Science in Veterinary Technology will be prepared for entry-level employment in a variety of fields including, but not limited to: Certified Veterinary Technician (CVT), Emergency Veterinary Technician, Internal Medicine Veterinary Technician, Licensed Veterinary Technician (LVT), Medical Technologist, Registered Veterinary Technician (RVT), Veterinary Assistant, Veterinary Laboratory Technician (Veterinary Lab Tech), Veterinary Nurse, Veterinary Technician (Vet Tech).

NOTES

- ‡These courses are only offered on the day schedule and will not be scheduled to begin after 4:00 p.m.
- ◊ BVC does not allow transfer credits for the following courses: VT224 Lab Animals, Exotics and Pocket Pets; VT259 Surgical Assisting; VT271 Production Animals, and VT281 Equine.
- Students may be required to complete VT051 Veterinary Foundations of Math and/or NS070 Algebra 116 Lab as a co-requisite to NS116 and/or CM070 Writing 121 Lab as a co-requisite to CM121 Composition based upon competency exam scores.
- This program can lead to licensure, certification or registration depending on state regulations, and upon passing the Veterinary Technician National Examination (VTNE). The veterinary technology program does lead to state certification in the state of Utah, as a certified veterinary technician (CVT) upon graduation and passing the VTNE. Relocating could impact whether you meet licensure requirements, if applicable, in another state or territory. For state and territory requirements, please refer to the Professional Licensure section of this catalog or visit our website at: https://broadviewuniversity.edu/accreditation-consumer-info/
This program is offered residentially.

**OBJECTIVES**

The objective of the Massage Therapy certificate program is to emphasize skills and knowledge for entry-level employment as a massage therapist. After successful completion of this program, students will be eligible to take MBLEx licensing exam offered by the Federation of State Massage Therapy Board (FSMTB). Students will be eligible for professional membership in such associations as the American Massage Therapy Association (AMTA) and the Association of Bodywork and Massage Professionals (ABMP).

The goal of this program is to prepare graduates who are able to:

1. Demonstrate industry appropriate entry-level massage and bodywork techniques through hands-on application.
2. Identify appropriate client condition for massage or bodywork.
3. Assess client movement and behavior and develop industry appropriate massage and bodywork treatment plans.
4. Exhibit industry specific personal and professional boundaries in the work setting.
5. Identify the massage therapy licensing laws, rules and regulations specific to the student’s state of residence.
6. Explain compliance rules in regards to health regulatory agencies and universal health precautions.
7. Analyze basic anatomy, physiology, pathology and kinesiology concepts in relation to massage and bodywork.

**CAREER OPPORTUNITIES:** Graduates from the Certificate in Massage Therapy will be prepared for entry-level employment in a variety of fields including, but not limited to: Bodywork Therapist, Certified Massage Therapist (CMT), Clinical Massage Therapist, Hospice Massage Therapist, Integrated Deep Tissue Massage Therapist, Licensed Massage Practitioner (LMP), Licensed Massage Therapist, Massage Therapist, Medical Massage Therapist, Registered Massage Therapist, Therapeutic Massage Technician.

**NOTES**

- Acceptance and successful progression through the Massage Therapy program does not ensure licensure eligibility. This program does lead to professional licensure, upon passing the MBLEx licensing exam offered by the Federation of State Massage Therapy Board (FSMTB). Licensure is required to practice massage therapy in the state of Utah. The certificate in massage therapy program meets Utah licensure requirements. Relocating could impact whether you meet licensure requirements in another state or territory. For state and territory requirements, please visit the state regulations page on the FSMTB website:  
  https://www.fsmtb.org/consumer-information/regulated-states/  
  or visit our website for a list of each state’s licensing agency and requirements:  
  https://broadviewuniversity.edu/accreditation-consumer-info/

- The Utah Division of Occupational Professional Licensing (DOPL) requires licensure for massage therapists and makes final determination on eligibility to sit for state licensing exams and issuance of a license to practice massage therapy.

- Applicants who have been convicted of a felony or have a history of mental illness or drug abuse should contact the Bureau Manager for Massage Therapy at DOPL to discuss their eligibility to be licensed.
This program is online with the required exam preps and certification exams conducted residentially at the MAT® World Headquarters in Denver, CO.

OBJECTIVES

The objective of the Muscle Activation Techniques® Specialist certificate program is to provide understanding of the MAT® skillset to students who have knowledge in the health and fitness field. This program enhances a student’s current competencies related to the human body and muscle function. The program studies the MAT® approach to assessment and correction of muscular imbalances in the human body. Students are trained on the MAT® tools used to identify restrictions in joint instability relating to muscle tightness and weakness. Students gain an understanding of the unique systematic format provided through Muscle Activation Techniques® in order for them to help their clients function with maximum efficiency and balance out the muscular system. At the completion of this program, including passing of all certification exams, students will be awarded the credential of certified MAT® Specialist.

The goal of this program is to prepare graduates who are able to:

1. Understand the muscular system through assessment of muscle function relating to muscle weakness.
2. Examine and understand range of motion limitations in relation to potential muscle weakness.
3. Demonstrate an understanding on how isolated weaknesses affect the integrated muscular system.
4. Master the practical application of palpation techniques designed to improve the neural integrity of inhibited muscles.
5. Gain the skills to thoroughly address the mechanical imbalances and how they affect overall health and performance.

CAREER OPPORTUNITIES: Graduates from the Certificate in Muscle Activation Techniques® Specialist will be prepared for employment in the field of health and fitness; such as fitness trainer or fitness specialist.

Total Program Minimum Credit Requirement: 36

NOTES

- Entrance Requirements specific to the certificate: Students must be a licensed therapist or must hold a recognized fitness certification with a minimum of two years of experience as a fitness professional. Students who obtain undergraduate coursework in Anatomy and Physiology or advanced placement by examination will also be considered for acceptance.
- MAT® courses do not teach students techniques designed to diagnose or treat injuries.
- * All MAT® courses are conducted online and require exam preps and certification exams. Students will be required to travel throughout the program to the MAT® World Headquarters in Denver, CO.
- A minimum of eight students are required to run each of the MAT® courses. If enrollment for a course is below eight students, courses may be delayed until enrollment has reached the minimum number of students.
- Students in the program will be required to test for the MAT® certification at the MAT® World Headquarters in Denver, CO. Exam re-takes require individuals to arrange additional travel at their own expense.
- MAT® courses are not available to audit.
- Some institutional scholarships may not apply to the MAT® Specialist certificate program.
- Students are prepared for the MAT® Specialist certification exam. Acceptance and successful progression through the Certificate in Muscle Activation Techniques® Specialist program does not ensure certification or licensure eligibility. Licensure requirements are determined within cities, counties, municipalities, and states and students need to research local requirements to ensure compliance. At the time of publication, there is not a recognized state licensure for muscle activation techniques. State licensure of professions such as physical therapy, massage therapy and others may impact the techniques allowed by MAT® Practitioners in working with clients. Licensure rules are subject to change.
MAT® SPECIALIST MODULES

Each module is 12 weeks + Exam Preps & Certification Exams

The outcome for students taking these non-credit, short-term modules, whether an individual module, combination, or the grouping of all, is for students to achieve certification and preparation for advanced employment in the exercise sciences field using the trademarked Muscle Activation Techniques®. Modules are offered online. These 12 week, self-paced modules conclude with an exam prep and certification exam at the MAT® Headquarters in Denver, Colorado or Toronto, Canada. All online coursework must be successfully completed to attend the exam preps and certification exams. A certificate of completion for the online modules is provided by Broadview College. The MAT® certifications are granted by MAT® following successful completion of the examination.

- MAT340 Applications and Assessments of Lower Body Muscle Function I and II
- MAT350 Applications and Assessments of Upper Body Muscle Function I and II
- MAT360 Applications and Assessments of Trunk and Spine Muscle Function I and II
- MAT370 Applications and Assessments of Cervical Spine and Small Motion Muscle Function

NOTES
- MAT® modules do not teach students techniques designed to diagnose or treat injuries.
- Students will receive a grade of NC (Non-Credit) for module completion
- Successfully completing all four Specialist modules and passing all four certification exams will result in MAT® Specialist Full Body certification.
- Acceptance and successful progression through the MAT® modules does not ensure certification or licensure eligibility. Licensure requirements are determined within cities, counties, municipalities, and states and students need to research local requirements to ensure compliance. At the time of publication, there is not a recognized state licensure for muscle activation techniques. State licensure of professions such as physical therapy, massage therapy and others may impact the techniques allowed by MAT® Practitioners in working with clients. Licensure rules are subject to change.

SPECIALIST MODULES DESCRIPTIONS

MAT340 Applications and Assessments of Lower Body Muscle Function I and II 120 Clock Hours

Prerequisite: Participants must be licensed therapist, or have obtained certification in the MAT® Lower Body. Students will be introduced to Muscle Activation Techniques® for the lower body and explore the relationship of muscle function to joint stability, relating to joint mobility. Students will evaluate range of motion in lower body movements and use the assessments to identify areas of muscle weakness. Study includes applications of isolated muscle strength testing, palpation of muscle attachment points along with corrective isometrics, and reinforcement exercises. Students will investigate Muscle Activation Techniques® for the lower body and examine the relationship of muscle function to joint stability, relating to joint mobility. Students will evaluate range of motion in lower body movements and use the assessments to identify areas of muscle weakness with a focus on the lower extremities. Further study includes applications of isolated muscle strength testing, palpation of muscle attachment points along with corrective isometrics, and reinforcement exercises. Successful completion of the online coursework, the exam prep and certification exam, and passing the certification exam will allow participants to become certified in MAT® Lower Body.

MAT350 Applications and Assessments of Upper Body Muscle Function I and II 120 Clock Hours

Prerequisite: Participants must be licensed therapist, or have been certified in the MAT® Upper Body. Students will be introduced to Muscle Activation Techniques® for the upper body and explore the relationship of muscle function to joint stability, relating to joint mobility. Students will evaluate range of motion in upper body movements and use the assessments to identify areas of muscle weakness with a focus on the shoulder girdle. Study includes applications of isolated muscle strength testing, palpation of muscle attachment points along with corrective isometrics, and reinforcement exercises. Students will investigate Muscle Activation Techniques® for the upper body and examine the relationship of muscle function to joint stability, relating to joint mobility. Students will evaluate range of motion in upper body movements and use the assessments to identify areas of muscle weakness. Further study includes applications of isolated muscle strength testing, including break testing and neuroproprioceptive response testing; palpation of muscle attachment points along with corrective isometrics; and reinforcement exercises. Successful completion of the online coursework, the exam prep and certification exam, and passing the certification exam will allow participants to become certified in MAT® Upper Body.

MAT360 Applications and Assessments of Trunk and Spine Muscle Function I and II 120 Clock Hours

Prerequisite: Participants must have obtained certification in one MAT® online module. In this course, students will investigate Muscle Activation Techniques® for the trunk and spine and explore the relationship of muscle function to joint stability, relating to joint mobility. Participants will evaluate range of motion in movements of the trunk and spine and use the assessments to identify areas of muscle weakness in the trunk and spine. Further study includes applications of isolated muscle strength testing, palpation of muscle attachment points along with corrective isometrics, and reinforcement exercises. This course will provide information for participants to learn the complexities of the trunk and spine muscular systems to help practitioner’s better address muscle dysfunction in these areas. Successful completion of the online coursework, the exam prep and certification exam, and passing the certification exam will allow participants to become certified in MAT® Trunk and Spine.

MAT370 Applications and Assessments of Cervical Spine and Small Motion Muscle Function 120 Clock Hours

Prerequisite: Participants must have obtained certification in two MAT® online modules or be a licensed therapist with a minimum of one MAT® online module certification. Participants will investigate Muscle Activation Techniques® for the hand, foot and cervical spine. Participants will explore the relationship of muscle function to joint stability as it relates to joint mobility. Participants will evaluate range of motion in movements of the foot, hand, and cervical spine. They will use the MAT® assessments (CAM® and AMC&S®) to identify areas of muscle weakness in the hand, foot and cervical spine. Further study includes applications of isolated muscle strength testing, palpation of muscle attachment points along with corrective isometrics, and reinforcement exercises. Participants will review and gain a better understanding of the importance of the evaluation and assessment process in their MAT® practice. Participants will also gain an understanding on how to stress the body in order to duplicate the stresses that may result in recurring injuries. Successful completion of the online coursework, the exam prep and certification exam, and passing the certification exam will allow participants to become certified in MAT® Cervical, Hand and Foot.
MAT® SPECIALIST REFRESHER MODULES

Each module is 12 weeks

The refresher modules are designed for current MAT® Specialists to continue to strengthen their skills as practitioners of Muscle Activation Techniques®. Modules are offered online. These are 12-week, self-paced modules. The modules will provide required continuing education hours for maintaining current status with the MAT® Specialist Certification. Whether an individual module or the grouping of all, the outcome for students is to achieve stronger results with their skills as a certified MAT® Specialist. A certificate of completion for the online modules is provided by Broadview College.

MAT345 MAT® Specialist Lower Body Refresher
MAT355 MAT® Specialist Upper Body Refresher
MAT365 MAT® Specialist Trunk and Spine Refresher
MAT375 MAT® Specialist Cervical Spine Hand/Foot Refresher

NOTES
- MAT® modules do not teach students techniques designed to diagnose or treat injuries.
- Students will receive a grade of NC (Non-Credit) for module completion.
- Acceptance and successful progression through the MAT® modules does not ensure certification or licensure eligibility. Licensure requirements are determined within cities, counties, municipalities, and states and students need to research local requirements to ensure compliance. At the time of publication, there is not a recognized state licensure for muscle activation techniques. State licensure of professions such as physical therapy, massage therapy and others may impact the techniques allowed by MAT® Practitioners in working with clients. Licensure rules are subject to change.

SPECIALIST REFRESHER MODULE DESCRIPTIONS

MAT345 MAT® Specialist Lower Body Refresher 40 Clock Hours

The objective of the Muscle Activation Techniques® lower body refresher module is to provide review and full understanding of the MAT® skillset to students who have completed the MAT® Specialist program. This lower body module studies the MAT® approach to assessment and correction of muscular imbalances in the human body. Students are trained on the MAT® tools used to identify restrictions in joint instability relating to muscle tightness and weakness within the lower body. Students gain an understanding of the unique systematic format provided through Muscle Activation Techniques® in order for them to help their clients function with maximum efficiency and balance out the muscular system. Successful completion of this online coursework satisfies the annual required continuing education for maintaining one's MAT® Specialist Certification.

MAT355 MAT® Specialist Upper Body Refresher 40 Clock Hours

The objective of the Muscle Activation Techniques® upper body refresher module is to provide review and full understanding of the MAT® skillset to students who have completed the MAT® Specialist program. This upper body module studies the MAT® approach to assessment and correction of muscular imbalances in the human body. Students will evaluate range of motion in upper body movements and use the assessments to identify areas of muscle weakness with a focus on the shoulder girdle. Study includes applications of isolated muscle strength testing, palpation of muscle attachment points along with corrective isometrics, and reinforcement exercises. Students will investigate Muscle Activation Techniques® for the upper body and examine the relationship of muscle function to joint stability, relating to joint mobility. Students will evaluate range of motion in upper body movements and use the assessments to identify areas of muscle weakness. Further study includes applications of isolated muscle strength testing, including break testing and neuroproprioceptive response testing; palpation of muscle attachment points along with corrective isometrics; and reinforcement exercises. Students gain an understanding of the unique systematic format provided through Muscle Activation Techniques® in order for them to help their clients function with maximum efficiency and balance out the muscular system. Successful completion of this online coursework satisfies the annual required continuing education for maintaining one's MAT® Specialist Certification.

MAT365 MAT® Specialist Trunk and Spine Refresher 40 Clock Hours

The objective of the Muscle Activation Techniques® (MAT®) Trunk and Spine refresher module is to provide review and full understanding of the MAT® skillset to participants who have completed the MAT® Specialist program. In this course, participants will study Muscle Activation Techniques® for the trunk and spine and explore the relationship of muscle function to joint stability, relating to joint mobility. Participants will evaluate range of motion in movements of the trunk and spine and use the assessments to identify areas of muscle weakness in the trunk and spine. Further study includes applications of isolated muscle strength testing, palpation of muscle attachment points along with corrective isometrics, and reinforcement exercises. This course will provide information for participants to learn the complexities of the trunk and spine muscular systems to help practitioner’s better address muscle dysfunction in these areas. Participants expand their understanding of the unique systematic format provided through Muscle Activation Techniques® in order for them to help their clients function with maximum efficiency and balance out the muscular system. Successful completion of this online coursework satisfies the annual required continuing education for maintaining one's MAT® Specialist Certification.

MAT375 MAT® Specialist Cervical Spine Hand/Foot Refresher 40 Clock Hours

The objective of the Muscle Activation Techniques® (MAT®) Hand, Foot and Cervical Spine Refresher module is to provide review and full understanding of the MAT® skillset to participants who have completed the MAT® Specialist program. Participants will study Muscle Activation Techniques® for the hand, foot and cervical spine and explore the relationship of muscle function to joint stability, relating to joint mobility. Participants will evaluate range of motion in movements of the hand, foot and cervical spine. They will use the assessments to identify areas of muscle weakness in the hand, foot and cervical spine. Further study includes applications of isolated muscle strength testing, palpation of muscle attachment points along with corrective isometrics, and reinforcement exercises. Participants will review and gain a better understanding of the importance of the evaluation and assessment process in their MAT® practice. Participants will also gain an understanding on how to stress the body in order to duplicate the stresses that may result in recurring injuries. Participants expand their understanding of the unique systematic format provided through Muscle Activation Techniques® in order for them to help their clients function with maximum efficiency and balance out the muscular system. Successful completion of this online coursework satisfies the annual required continuing education for maintaining one's MAT® Specialist Certification.
**MAT® MASTERY MODULES DESCRIPTIONS**

**MAT400  Mastery Applications and Assessments of Lower Body  60 Clock Hours**

Prerequisite: Participants must be MAT® Specialist Certified or MAT® Lower Body Certified for a minimum of one (1) year. Students will learn advanced skills in Muscle Activation Techniques® for the lower body and continue to explore the relationship of muscle function to joint stability, relating to joint mobility. Students will learn an advanced evaluation process to assess range of motion in lower body movements and use the advanced assessment to identify areas of muscle weakness. Study includes a stronger emphasis on the applications of isolated muscle strength testing, palpation of muscle attachment points along with corrective isometrics, and reinforcement exercises. Students will review and gain a better understanding of the importance of the evaluation and assessment process in their MAT® practice. Successful completion of the online coursework, the exam prep and certification exam, and passing the certification exam will allow participants to become certified in MAT® Mastery Lower Body.

**MAT405  Mastery Applications and Assessments of Upper Body  60 Clock Hours**

Prerequisite: Participants must be MAT® Specialist Certified or MAT® Upper Body Certified for a minimum of one (1) year. Students will gain advanced skills in Muscle Activation Techniques® for the upper body and continue to explore the relationship of muscle function to joint stability, relating to joint mobility. Students will learn an advanced evaluation process to assess range of motion in upper body movements and use this advanced assessments to identify areas of muscle weakness in the upper body. Study includes a stronger emphasis on the applications of isolated muscle strength testing, palpation of muscle attachment points along with corrective isometrics, and reinforcement exercises for the upper body. Students will review and gain a better understanding of the importance of the evaluation and assessment process in their MAT® practice. Successful completion of the online coursework, the exam prep and certification exam, and passing the certification exam will allow participants to become certified in MAT® Mastery Upper Body.
MAT® MASTERY REFRESHER MODULES
Each module is 6 weeks
The refresher modules are designed for current master level certified MAT® practitioners to continue to strengthen their skills as practitioners of Muscle Activation Techniques®. Modules are offered online. These are 6-week self-paced modules. The modules will provide required continuing education hours for maintaining current status with the MAT® Mastery Certification. Whether an individual module, combination, or the grouping of all, the outcome for students is to achieve stronger results with their skills as a master level certified MAT® practitioner. A certificate of completion for the online modules is provided by Broadview College.

MAT402 MAT® Mastery Lower Body Refresher 20 Clock Hours
Prerequisite: MAT® Mastery Certified or previously completed a Mastery Lower Body course. Students will review advanced skills in Muscle Activation Techniques® for the lower body and continue to explore the relationship of muscle function to joint stability, relating to joint mobility. Students will review an advanced evaluation process to assess range of motion in lower body movements and how to use this advanced assessments to identify areas of muscle weakness within the lower body. Study includes a stronger emphasis on the applications of isolated muscle strength testing, palpation of muscle attachment points along with corrective isometrics, and reinforcement exercises for the lower body. Students will review and gain a better understanding of the importance of the evaluation and assessment process in their MAT® practice. Successful completion of this online coursework satisfies the annual required continuing education for maintaining one’s MAT® Mastery level certification.

MAT412 MAT® Mastery Upper Body Refresher 20 Clock Hours
Prerequisite: MAT® Mastery Certified or previously completed a Mastery Upper Body course. Students will review advanced skills in Muscle Activation Techniques® for the upper body and continue to explore the relationship of muscle function to joint stability, relating to joint mobility. Students will review an advanced evaluation process to assess range of motion in upper body movements and how to use this advanced assessments to identify areas of muscle weakness within the upper body. Study includes a stronger emphasis on the applications of isolated muscle strength testing, palpation of muscle attachment points along with corrective isometrics, and reinforcement exercises for the upper body. Students will review and gain a better understanding of the importance of the evaluation and assessment process in their MAT® practice. Successful completion of this online coursework satisfies the annual required continuing education for maintaining one’s MAT® Mastery level certification.

MAT422 MAT® Mastery Trunk and Spine Refresher 20 Clock Hours
Prerequisite: MAT® Mastery Certified or previously completed a Mastery Trunk and Spine course. In this course, students will review advanced skills in Muscle Activation Techniques® for the trunk and spine and explore the relationship of muscle function to joint stability, relating to joint mobility. Students will review the advanced evaluation process for range of motion in movements of the trunk and spine and how to use this advanced assessments to identify areas of muscle weakness in the trunk and spine. Further study includes applications of isolated muscle strength testing, palpation of muscle attachment points along with corrective isometrics, and reinforcement exercises for the trunk and spine. This course will provide a deeper understanding about the complexities of the trunk and spine muscular systems to help practitioner’s better address muscle dysfunction in these areas. Students will review and gain a better understanding of the importance of the evaluation and assessment process in their MAT® practice. Successful completion of this online coursework satisfies the annual required continuing education for maintaining one’s MAT® Mastery level certification.

MAT432 MAT® Mastery Cervical Spine Refresher  20 Clock Hours
Prerequisite: MAT® Mastery Certified or previously completed a Mastery Cervical Spine course. Students will review an advanced level of skills in Muscle Activation Techniques® for the cervical spine and explore the relationship of muscle function to joint stability, relating to joint mobility. Students will review an advanced evaluation process for range of motion in movements of the cervical spine and use this advanced assessments to identify areas of muscle weakness in the cervical spine. Further study includes applications of isolated muscle strength testing, palpation of muscle attachment points along with corrective isometrics, and reinforcement exercises for the cervical spine. Students will review and gain a better understanding of the importance of the evaluation and assessment process in their MAT® practice. Successful completion of this online coursework satisfies the annual required continuing education for maintaining one’s MAT® Mastery level certification.

MAT442 MAT® Mastery Foot Function Refresher 20 Clock Hours
Prerequisite: MAT® Mastery Certified or previously completed a Mastery Foot Function course. Students will gain an advanced level of skills in Muscle Activation Techniques® for the foot and explore the relationship of muscle function to joint stability, relating to joint mobility. Students will learn an advanced evaluation process for range of motion in movements of the foot and use this advanced assessments to identify areas of muscle weakness in the foot. Further study includes applications of isolated muscle strength testing, palpation of muscle attachment points along with corrective isometrics, and reinforcement exercises for the foot. Students will review and gain a better understanding of the importance of the evaluation and assessment process in their MAT® practice. This course will explore the specific divisions of the foot and fine-tune their MAT® skills to identify and treat muscular imbalances.

MAT452 MAT® Mastery Wrist and Hand Refresher 20 Clock Hours
Prerequisite: MAT® Mastery Certified or previously completed a Mastery Wrist and Hand course. Students will review advanced skills in Muscle Activation Techniques® for the wrist and hand. Students will review an advanced range of motion assessment process for the wrist and hand. They will use the assessments to identify areas of muscle weakness in the wrist and hand. Further study includes a higher level of accountability on the applications of isolated muscle strength testing, palpation of muscle attachment points along with corrective isometrics, and reinforcement exercises for the wrist and hand. Students will review and gain a better understanding of the importance of the evaluation and assessment process in their MAT® practice. Successful completion of this online coursework satisfies the annual required continuing education for maintaining one’s MAT® Mastery level certification.

These non-credit, short-term modules are not approved by ACICS as part of the institution’s accreditation and are offered for the sole purpose of continuing education, professional development, or preparation.

41
MATRx® MODULES
Each module is 12 weeks + Exam Preps & Certification Exam

The outcome for students taking these non-credit, short-term modules, whether an individual module, combination, or the grouping of all, is for students to achieve certification and preparation for advanced employment in the exercise sciences arena using the trademarked Muscle Activation Techniques®. These 12 week, self-paced modules conclude with an exam prep and certification exam at the MAT® Headquarters in Denver, Colorado. All online coursework must be successfully completed to attend the exam prep and certification exams. A certificate of completion for the modules is provided by Broadview College. The MAT® certification is granted by MAT® following successful completion of the examination.

MAT550  MATRx® Module 1: MATRx® Foundation and Posterior Chain
MAT555  MATRx® Module 2: MATRx® Shoulders and Hips
MAT560  MATRx® Module 3: MATRx® Accessory Muscles
MAT565  MATRx® Module 4: MATRx® Cervical

NOTES
- Entrance requirements specific to the Muscle Activation Techniques (MAT) Rx® modules: Students must be an active MAT® Master Specialist or MATRx® Foot and Hand certified.
- MAT® modules do not teach students techniques designed to diagnose or treat injuries.
- A minimum of eight students are required to run each of the MATRx® modules. If enrollment for a module is below eight students, modules may be delayed until enrollment has reached the minimum number of students.
- Students will receive a grade of NC (Non-Credit) for module completion.
- Participants are required to complete the 4-module series within two years to be eligible for the MATRx® certification.
- Students in the Muscle Activation Techniques (MAT) Rx® modules will be required to test for the MAT® certification at the MAT® World Headquarters. Exam re-takes require individuals to arrange additional travel at their own expense.
- Successful completion of all four modules, and passing the certification exam will allow participants to become certified in MATRx®.
- Muscle Activation Techniques (MAT) Rx® modules are not available to audit.
- Some institutional scholarships may not apply to the Muscle Activation Techniques (MAT) Rx® modules.
- Acceptance and successful progression through the MAT® modules does not ensure certification or licensure eligibility. Licensure requirements are determined within cities, counties, municipalities, and states and students need to research local requirements to ensure compliance. At the time of publication, there is not a recognized state licensure for muscle activation techniques. State licensure of professions such as physical therapy, massage therapy and others may impact the techniques allowed by MAT® Practitioners in working with clients. Licensure rules are subject to change.

MATRx® MODULES DESCRIPTIONS
MAT550  MATRx® Module 1: MATRx® Foundation and Posterior Chain  70 Clock Hours
Prerequisite: Must be an active MAT® Master Specialist or MATRx® Foot and Hand certified. Participants will learn the foundation behind the most precise level of application of Muscle Activation Techniques®. The MATRx program utilizes the basic skill set of MAT and progresses participants into the implementation of a 43 pattern, systematic evaluation and treatment process that enables the student to administer a total body neuromuscular overhaul on their clients’ muscular systems. The MATRx prescriptive rules are the most effective form of sequencing the MAT tools, enabling the participants to be able to challenge force tolerance levels in order to increase the stress threshold within the neuromuscular system. Participants will learn various patterns out of a total body RX process from MAT that is designed to improve the communication between the nervous system and the muscular system in the most precise and effective way possible. In this module, participants will learn the complex MATRx sequencing patterns for the muscles of the foundational core and the posterior chain.

MAT555  MATRx® Module 2: MATRx® Shoulders and Hips  70 Clock Hours
Prerequisite: MATRx® Module 1. Participants will continue to learn the most precise level of application of Muscle Activation Techniques®. The MATRx program utilizes the basic skill set of MAT and progresses participants into the implementation of a 43 pattern, systematic evaluation and treatment process that enables the student to administer a total body neuromuscular overhaul on their clients’ muscular systems. The MATRx prescriptive rules are the most effective form of sequencing the MAT tools, enabling the participants to be able to challenge force tolerance levels in order to increase the stress threshold within the neuromuscular system. Participants will learn various patterns out of a total body RX process from MAT that is designed to improve the communication between the nervous system and the muscular system in the most precise and effective way possible. In this module, participants will learn the complex MATRx sequencing patterns for the muscles of the shoulders and hips.

MAT560  MATRx® Module 3: MATRx® Accessory Muscles  70 Clock Hours
Prerequisite: MATRx® Module 2. Participants will continue to learn the most precise level of application of Muscle Activation Techniques®. The MATRx program utilizes the basic skill set of MAT and progresses participants into the implementation of a 43 pattern, systematic evaluation and treatment process that enables the student to administer a total body neuromuscular overhaul on their clients’ muscular systems. The MATRx prescriptive rules are the most effective form of sequencing the MAT tools, enabling the participants to be able to challenge force tolerance levels in order to increase the stress threshold within the neuromuscular system. Participants will learn various patterns out of a total body RX process from MAT that is designed to improve the communication between the nervous system and the muscular system in the most precise and effective way possible. In this module, participants will learn the complex MATRx sequencing patterns for the muscles of the Lower leg and foot along with the wrist and hand.

MAT565  MATRx® Module 4: MATRx® Cervical  70 Clock Hours
Prerequisite: MATRx® Module 3. Participants will continue to learn the most precise level of application of Muscle Activation Techniques®. The MATRx program utilizes the basic skill set of MAT and progresses participants into the implementation of a 43 pattern, systematic evaluation and treatment process that enables the student to administer a total body neuromuscular overhaul on their clients’ muscular systems. The MATRx prescriptive rules are the most effective form of sequencing the MAT tools, enabling the participants to be able to challenge force tolerance levels in order to increase the stress threshold within the neuromuscular system.
**MAT® SPECIALIST & MASTERY WORKSHOPS**

Each workshop is 1 day

The one-day live virtual workshop is for students to refine their skillset at the specialist or mastery level. We recommend having a practice client to work on for the day to perform your practical work as you review your techniques. Opportunity to get your questions answered by the virtual instructor through the chat feature will be available. Full day attendance and participation in a workshop will fulfill the annual MAT® CEC requirement. Limited spots available.

Prerequisite: Students must be MAT® certified in the single subject to be eligible for that specific workshop.

**MAT® SPECIALIST WORKSHOPS**

The following is a guideline for course numbers and class sequencing:

- **00-99** Remedial Courses
- **100-149** Courses having no prerequisite and courses normally taken during the first quarter
- **150-199** Courses normally having prerequisites from the 100-149 level
- **200-249** Courses normally having prerequisites from the 150-199 level
- **250-299** Courses normally having prerequisites from the 200-249 level
- **300-499** Courses are upper-level and satisfy upper-level course requirements in bachelor's degree programs
- **300-399** Courses normally having prerequisites from the 100-299 level
- **400-499** Courses normally having prerequisites from the 100-399 level

Definitions of prerequisite, co-requisite, and concurrent:

- **Prerequisite:** Course must have been taken in a prior quarter
- **Co-requisite:** Course must be taken the same quarter
- **Concurrent:** Course may be taken in the same quarter

**Prerequisites for BS105:** None. This course gives students an overview of the interrelated factors making up the business environment including ethics, entrepreneurship, marketing, management, leadership, finances and information technology. In addition, the student learns about past, present and future trends in business. The student develops decision-making and problem-solving skills through case studies, group exercises and presentations.

**Prerequisites for BS200:** None. This course introduces small business management in the real world. Topics include writing business plans, financial report analysis, business acquisition, government regulations and legal issues affecting small businesses, site selection, and assessing future prospects of a business. There is a major focus on entrepreneurial activities and the traits of entrepreneurs. Students integrate their work and life experiences with case studies, class projects and discussion as they investigate problems and opportunities involved in operation of small businesses.

**Prerequisites for BS311:** Organizational Behavior

**Prerequisites or Concurrent:** drop project is the course examines how organizations are formed, in terms of how and why forms take shape; the effects forms or structures of organizations have on their operations and effectiveness; and how the study of behavior of people within an organization can be used to improve an organization's effectiveness.

**Prerequisites for BS340:** Leadership and Management

**Prerequisites:** BS105 or BS180, or EB120 or equivalent, CM121. This course explores historical and modern management concepts, including managerial planning, organizing, controlling, motivating, ethics, decision-making, communicating, and group behavior and leadership. Students employ leadership strategies to resolve realistic management problems.

**Prerequisites for BS380:** Project Management

**Prerequisites:** BS105 or BS180 or BS200 or EB120 or equivalent. This course introduces students to the challenges of managing multiple projects and to techniques, tools and theories used to manage projects successfully. These techniques include project selection, planning, control, work breakdown structures, cost estimates, risk management and financing.

**Prerequisites for BS400:** Strategic Planning

**Prerequisites:** BS105 or EB120. This course introduces students to strategic planning for domestic and global competition. Students explore successful strategic planning from a fundamental, analytical, control, and innovative perspective. Class exercises and case studies emphasize the underpinning of business structure to enhance strategic competition encompassing all aspect of the business.

**Prerequisites for CM070:** None; co-requisite to CM121. This course provides intensive instruction and practice in writing coherent paragraphs and essays for specific audiences; the writing lab includes the drafting, revision, and editing processes as well as instruction in grammar, mechanics, and usage. Students develop college-level writing skills.

**Prerequisites for CM111:** None. Students examine the function of language in the communication process as it applies to speech construction and delivery. Activities including discussion and delivery of prepared speeches provide communication skills for personal and professional applications.

**Prerequisites for CM121:** Composition

**Prerequisites:** Advanced Standing or Co-requisite: CM070. Students develop college-level writing skills, composing essays and formal research papers using APA documentation citation style.

**Prerequisites for CM200:** Intercultural Communications

**Prerequisites:** CM121. The course explores cultural patterns and issues that influence effective communication across cultures.

**Prerequisites for CM210:** Creative Writing

**Prerequisites:** CM121. Students read, analyze and discuss representative samples of poetry, fiction, non-fiction, and drama to understand techniques employed by skilled writers. They apply those strategies in drafting a variety of creative works.

**Prerequisites for CM320:** Writing and Research

**Prerequisites:** CM121. Students study the role of scholarly research in academic disciplines. Topics include research tools and strategies, evaluation of online and print sources for scholarly publications, writing summaries and abstracts and the inclusion of research in writing assignments. Assignments include various writing projects and a final research paper.

**Prerequisites for CM330:** Technical Writing

**Prerequisites:** CM121 or equivalent. Students learn how to communicate detailed, technical information in a manner a layperson can understand. Purpose, organization and language are emphasized.

**HR300 Human Resource Management**

Prerequisite: BS105. This course covers legislation, job analysis, human resource planning, recruitment and selection, focusing on staffing an organization so it has the type and number of employees it needs at any given time. Topics may include new employee orientation, basic literacy training, education for high-level executives, career development programs to foster teamwork, comprehensive organizational development in response to change, compensation, and the collective bargaining process.

**HR311 Employment Law**

Prerequisite: BS180 or HR300. This course examines legal issues in the workplace, addressing employment law related to the employer/employee relationship, the legal context of a business and its importance to the overall success of a business, diversity and culture of the workplace, and legal issues that affect the motivation, production and equity of employees.

**HR315 Labor Relations**

Prerequisite: HR300. This course examines the Human Resource Professional’s role in employee and labor relations. The course explores the rules of collective bargaining, labor unions, union stewards, the rights of the employee and the organization in dealing with labor laws, ethnic, racial and gender considerations and relations in both the public and private sectors.

**HR350 Recruitment and Retention**

Prerequisite: HR300. This course covers practical implications of recruiting and retaining employees, including effects on business success. Students prepare systematic approaches to making hiring decisions that enhance a business’ human resources.

**HR400 Training and Development**

Prerequisite: None. This course covers basic concepts of training, reasons for training programs, goals that drive the training process and the importance of formal training to a business.

**HR440 Change Management**

Prerequisite: HR300. This course explores connections between theory, concepts and applications of change management. Students learn how to manage, implement and promote positive change in business environments, concepts of crisis management, and strategies for dealing with difficult employees.

**HU100 Introduction to Humanities**

Prerequisite or Concurrent: CM121. This course is an exploratory approach to the humanities focusing on literature, philosophy, comparative religion, music, sculpture, architecture and painting in a social/historical framework.

**HU112 Film in Society**

Prerequisite: None. Students develop an appreciation of film as a visual art, examining ways in which films impact our culture, our economy, and our society.

**HU130 Spanish I**

Prerequisite: None. This is the first of a two-quarter course for students with little or no background in the Spanish language. It provides basic proficiency in speaking, reading, writing and listening at the conversational level and general knowledge of Spanish-speaking cultures.

**HU145 Global Influences on American Music**

Prerequisite: None. This course explores the global, social, political, and cultural influences on the evolution of American music. Students will examine various musical genres including but not limited to, folk, ethnic, jazz, and popular music, and identify the influence composers, performers, and artists have had on our American cultural identity.

**HU150 Introduction to Literature**

Prerequisite: None. This course is a survey of short stories, poetry, and drama as literary forms with an emphasis on using literary analysis to interpret a wide range of literary works.

**HU230 Spanish II**

Prerequisite: HU130. Spanish II is the second of a two-quarter course designed for beginning students who have successfully completed Spanish I and intend to continue their studies in listening, speaking, reading and writing conversational Spanish and knowledge of Spanish-speaking cultures.

**HU315 World Literature**

Prerequisites: CM121 or HU150. This course examines global perspectives on literature using texts from a variety of genres including folktales, proverbs, poetry and short stories from throughout the world. Authors studied represent a variety of geopolitical contexts that provide diverse social and political settings for composition and consumption of the writings and media. Students compare and contrast literary elements of texts to understand the works’ historical and cultural significance.
MARKETING AND SALES

MK230 Advertising and Promotion 3 Credits
Prerequisite: None. This course introduces advertising and promotion management, emphasizing the role of advertising and promotion in an organization's marketing and communications. Topics include regulatory, social, and economic aspects of advertising.

MASSAGE THERAPY

MT101 Introduction to Anatomy and Physiology 4 Credits
Prerequisite: None. This course is a general introduction to human anatomy and physiology emphasizing structures and functions of various body systems. Students will study the terminology commonly used in a health care setting along with mechanisms by which the human body functions.

MT105 Kinesiology for Massage Therapists 4 Credits
Prerequisite or Concurrent: MT101. This course is an introduction to the study of human movement. Students will study movement with application and assessment creating direct application for effective treatment development. Gait assessment, muscle and structure lines of pull, sports and athletic specific movement, and common movement restrictions and disruptions will all be studied specific to human movement.

MT110 Anatomy and Physiology for Massage, 4 Credits
Prerequisites: MT101. Students explore advanced human anatomy and physiology emphasizing the structures, functions, and pathophysiology of the eleven body systems as they relate to massage therapy practitioners.

MT125 Pathology for Massage Therapists 4 Credits
Prerequisite: MT101. This course introduces postural analysis and disease conditions for eleven body systems, providing students with related skills needed by massage therapists.

MT135 Massage Techniques I 4 Credits
Prerequisite or Concurrent: MT101. This course introduces foundational knowledge and skills for a career in massage therapy. Topics include the history of massage, equipment, safety practices, basic musculoskeletal identification, benefits and contraindications of massage, body mechanics, therapist hygiene and self-care, technique application, client consultation, assessment, and basic documentation. Students receive hands-on training in skills and knowledge necessary to perform full-body 60, 90, and 120-minute Swedish massage protocol including the five basic strokes (effleurage, petrissage, friction, tapotement, and vibration/shaking), basic chair massage, trigger point massage, and Himalayan salt and hot stone massage routines. Students are introduced to energy work concepts, aromatherapy, and reflexology.

MT145 Massage Techniques II 4 Credits
Prerequisite or Concurrent: MT135. This hands-on training course will explore massage adaptation for identified groups of individuals that require therapists to allow for certain health limitations and make proper selection of specialized tools for safe therapeutic delivery. Information and instruction will provide students with the knowledge to safely perform pre-postnataal massage, geriatric massage, palliative care, hospice care, introductory cancer facilitation, and identify, report, and assist victims of abuse within their scope of practice and legal responsibilities. Students will also continue to develop and practice techniques learned in MT135 Massage Techniques I.

MT155 Massage Techniques III 4 Credits
Prerequisite: MT135. In this course students receive hands-on training in skills and knowledge to perform deep tissue, Rolfing, sports massage techniques, Russian sports massage, scraping and cupping techniques, active release therapy (ART), myofascial release massage, advanced trigger point, and lymphatic drainage. Students gain skills and knowledge necessary to assess the client’s condition so they apply the most effective technique. Each student performs deep-tissue, sports massage, and myofascial release massage techniques in lab.

MT175 Massage Techniques IV 4 Credits
Prerequisite or Concurrent: MT155. This course introduces students through hands-on training to advanced practice skills including craniosacral therapy, biodynamic massage, cupping therapy, traditional Chinese medicine foundations (TCM), Thai massage, shiatsu, and acupressure. Students will explore advanced energy work concepts such as polarity massage, Reiki, and chakra balancing. Students will learn to develop techniques to integrate into full body massage treatments.

MT185 Professional Business, Ethics, and Universal Precautions 4 Credits
Prerequisite: None. Students learn scope of practices, ethical standards, policies and regulations that affect a massage business. Topics include establishing self-care strategies and successful therapeutic and industry relationships; creating dynamic resumes and preparation for interviews; forming professional alliances, attracting target markets using sales, marketing, and retention strategies; developing social media marketing skills and branding an online business presence; understand basic tax and business license requirements; and how to apply financial, administrative, and insurance processes to the massage profession. Students create business plan outlines for massage practices, opening and maintaining clinic space, and develop a success binder to assist with establishing their desired career upon graduation. This course includes CPR/First aid certification, state rules and laws, and MBLEx preparation and state licensure requirements.

MT250 Clinical Lab 5 Credits
Prerequisite: MT155. This course is a 100-hour hands-on course where students apply knowledge and skills acquired in all massage technique courses. The student experiences a variety of body types and interactions with the public through activities including client interviews and assessments, creating client files, reviewing documentation, consulting and debriefing the client, recording accurate S.O.A.P. notes, and providing client education. Students will use this experience to master clinical skills, perform clerical functions, marketing skills, and customer service skills such as scheduling, re-booking, and following-up with clinic clients.

MEDICAL

MA111 Anatomy and Physiology 4 Credits
Prerequisites: None. This course is a general introduction to human anatomy and physiology emphasizing structures and functions of various body systems.

MA120 Health Care Law and Ethics 4 Credits
Prerequisite: None. This is an introduction to legal and ethical principles associated with the U.S. health care system. Topics include legal system, licensure and accreditation, consent, legal regulations that affect a massage business. Topics include establishing self-care strategies and successful therapeutic and industry relationships; creating dynamic resumes and preparation for interviews; forming professional alliances, attracting target markets using sales, marketing, and retention strategies; developing social media marketing skills and branding an online business presence; understand basic tax and business license requirements; and how to apply financial, administrative, and insurance processes to the massage profession. Students create business plan outlines for massage practices, opening and maintaining clinic space, and develop a success binder to assist with establishing their desired career upon graduation. This course includes CPR/First aid certification, state rules and laws, and MBLEx preparation and state licensure requirements.
Prerequisite: BS105. This entrepreneurship course is appropriate for a student interested in understanding how to successfully turn ideas into a business. Topics include introduction to entrepreneurship, feasibility analysis, developing an effective business model, industry and competitor analysis, writing a business plan, ethical and legal issues, financial management, challenges of growth, and franchising.

**MUSCLE ACTIVATION TECHNIQUES®**

**MAT205** Applications and Assessments of Lower Body Muscle Function I 4 Credits

Prerequisite: Participants must be a licensed therapist, or must obtain undergraduate coursework in anatomy and physiology and/or hold a recognized fitness certification with a minimum of two years of experience as a fitness professional. Students will be introduced to Muscle Activation Techniques (MAT®) for the lower body and explore the relationship of muscle function to joint stability, as it relates to joint mobility. Students will evaluate range of motion in lower body movements and use the MAT® assessments to identify areas of muscle weakness with a focus on the lower extremities. Study includes applications of the Comparative Assessment Mobility Evaluation (CAM®) procedure to evaluate range of motion and identify biomechanical imbalances within the lower body. Students will also learn how to correlate range of motion limitations to potential muscle weakness by using the Active Muscle Contract and Sustain (AMC&S®) procedure on the lower body.

**MAT210** Applications and Assessments of Lower Body Muscle Function II 5 Credits

Prerequisite: MAT205. Students will investigate Muscle Activation Techniques (MAT®) for the lower body and examine the relationship of muscle function to joint stability as it relates to joint mobility. Students will evaluate range of motion in lower body movements and use the MAT® assessments to identify areas of muscle weakness with a focus on the lower extremities. Study includes applications of the Comparative Assessment Mobility Evaluation (CAM®) procedure to evaluate range of motion and identify biomechanical imbalances within the lower body. Students will also learn how to correlate range of motion limitations to potential muscle weakness by using the Active Muscle Contract and Sustain (AMC&S®) procedure on the lower body. Further study includes palpation of muscle attachment points along with corrective isometrics and reinforcement exercises. The course concludes with a required exam prep & certification exam at the MAT® World Headquarters in Denver, CO and the practical MAT® Lower Body certification exam.

**MAT215** Applications and Assessments of Upper Body Muscle Function I 4 Credits

Prerequisite: MAT210. Students will be introduced to Muscle Activation Techniques® (MAT®) for the upper body and explore the relationship of muscle function to joint stability as it relates to joint mobility. Students will evaluate range of motion in upper body movements and use the MAT® assessments to identify areas of muscle weakness with a focus on the shoulder girdle. Study includes applications of the Comparative Assessment Mobility Evaluation (CAM®) procedure to evaluate range of motion and identify biomechanical imbalances within the upper body. Further study includes applications of isolated muscle strength testing using the Active Muscle Contract and Sustain (AMC&S®) procedure on the upper body to correlate range of motion limitations to potential muscle weakness. Palpation of muscle attachment points along with corrective isometrics and reinforcement exercises are also studied.

**MAT220** Applications and Assessments of Upper Body Muscle Function II 5 Credits

Prerequisite: MAT215. Students will investigate Muscle Activation Techniques® (MAT®) for the upper body and examine the relationship of muscle function to joint stability as it relates to joint mobility. Students will evaluate range of motion in upper body movements and use the MAT® assessments to identify areas of muscle weakness with a focus on the shoulder girdle. Further study includes applications of isolated muscle strength testing using the Active Muscle Contract and Sustain (AMC&S®) procedure on the upper body to correlate range of motion limitations to potential muscle weakness. Palpation of muscle attachment points along with corrective isometrics and reinforcement exercises are also studied. The course concludes with a required exam prep & certification exam at the MAT® World Headquarters in Denver, CO and the practical MAT® Upper Body certification exam.

**MAT225** Applications and Assessments of Trunk and Spine Muscle Function I 4 Credits

Prerequisite: MAT220. In this course, students will study Muscle Activation Techniques® for the trunk and spine and explore the relationship of muscle function to joint stability as it relates to joint mobility. Students will learn to evaluate range of motion in movements of the trunk and spine and use the MAT® assessments to identify areas of muscle weakness in the trunk and spine. Study includes application of the Comparative Assessment Mobility Evaluation (CAM®) procedure to evaluate range of motion and identify biomechanical imbalances within the trunk and spine. Further study includes applications of isolated muscle strength testing using the Active Muscle Contract and Sustain (AMC&S®) procedure on the trunk and spine to correlate range of motion limitations to potential muscle weakness. Palpation of muscle attachment points along with corrective isometrics and reinforcement exercises are also studied.
MAT230 Applications and Assessments of Trunk and Spine Muscle Function II 5 Credits
Prerequisite: MAT225. Students will investigate Muscle Activation Techniques® for the cervical spine and explore the relationship of muscle function to joint stability as it relates to joint mobility. Students will evaluate range of motion in movements of the cervical spine and use the MAT® assessments to identify areas of muscle weakness in the cervical spine. Study includes application of the Comparative Assessment Mobility Evaluation (CAM®) procedure to evaluate range of motion and identify biomechanical imbalances within the cervical spine. Further study includes applications of isolated muscle strength testing using the Active Muscle Contract and Sustain (AMC&S®) procedure on the cervical spine to correlate range of motion limitations to potential muscle weakness. Palpation of muscle attachment points along with corrective isometrics and reinforcement exercises are also studied. The course concludes with a required exam prep & certification exam at the MAT® World Headquarters in Denver, CO and the practical MAT® Spine Certification exam.

MAT235 Applications and Assessments of Cervical Spine Muscle Function 4 Credits
Prerequisite: MAT230. Students will investigate Muscle Activation Techniques® for the foot and explore the relationship of muscle function to joint stability as it relates to joint mobility. Students will learn to evaluate range of motion in movements of the foot. They will use the MAT® assessments to identify areas of muscle weakness in the foot. Study includes application of the Comparative Assessment Mobility Evaluation (CAM®) procedure to evaluate range of motion and identify biomechanical imbalances within the foot. Further study includes applications of isolated muscle strength testing using the Active Muscle Contract and Sustain (AMC&S®) procedure on the foot to correlate range of motion limitations to potential muscle weakness. Students will also learn the applications of palpation of muscle attachment points along with corrective isometrics, and reinforcement exercises for the foot.

MAT240 Application and Assessments of Small Motion Muscle Function: Hand and Foot 5 Credits
Prerequisite: MAT235. Students will investigate Muscle Activation Techniques® for the hand and explore the relationship of muscle function to joint stability as it relates to joint mobility. Students will evaluate range of motion in movements of the hand. They will use the MAT® assessments to identify areas of muscle weakness in the hand. Study includes application of the Comparative Assessment Mobility Evaluation (CAM®) procedure to evaluate range of motion and identify biomechanical imbalances within the hand. Further study includes applications of isolated muscle strength testing using the Active Muscle Contract and Sustain (AMC&S®) procedure on the hand to correlate range of motion limitations to potential muscle weakness. Students will also learn the applications of palpation of muscle attachment points along with corrective isometrics, and reinforcement exercises. The course concludes with a required exam prep & certification exam at the MAT® World Headquarters in Denver, CO and the practical MAT® Hand and Foot certification exam.

MAT460 MAT Lower Body Mastery 6 Credits
Prerequisite: Must be MAT Specialist Certified or MAT Lower Body Certified. Students will advance their learning of Muscle Activation Techniques® of the lower body to improve muscle function and joint stability. The course content includes a stronger emphasis on the applications of isolated muscle strength testing, palpation of muscle attachment points along with corrective isometrics for the muscles of the lower body. Students will learn a new process for assessing range of motion by advancing their skills from an active to a passive range of motion assessment.

MAT465 MAT Upper Body Mastery 6 Credits
Prerequisite: Must be MAT Specialist Certified or MAT Upper Body Certified. Students will advance their learning of Muscle Activation Techniques® of the upper body to improve muscle function and joint stability. The course content includes a stronger emphasis on the applications of isolated muscle strength testing, palpation of muscle attachment points along with corrective isometrics for the muscles of the upper body. Students will learn a new process for assessing range of motion by advancing their skills from an active to a passive range of motion assessment.

MAT470 MAT Trunk and Spine Mastery 6 Credits
Prerequisite: Must be MAT Specialist Certified or MAT Trunk and Spine Certified. Students will advance their learning of Muscle Activation Techniques® of the trunk and spine to improve muscle function and joint stability. The course content includes a stronger emphasis on the applications of isolated muscle strength testing, palpation of muscle attachment points along with corrective isometrics for the muscles of the trunk and spine. Students will learn a new process for assessing range of motion by advancing their skills from an active to a passive range of motion assessment.

MAT475 MAT Cervical Master Course 6 Credits
Prerequisite: Must be MAT Specialist Certified or MAT Cervical, Hand and Foot Certified. Students will advance their learning of Muscle Activation Techniques® of the cervical muscles to improve muscle function and joint stability. The course content includes a stronger emphasis on the applications of isolated muscle strength testing, palpation of muscle attachment points along with corrective isometrics for the muscles of the cervical spine. Students will learn a new process for assessing range of motion in these areas by advancing their skills from an active to a passive range of motion assessment.

MAT480 MAT Foot Function Master Course 6 Credits
Prerequisite: Must be MAT Specialist Certified. Students will advance their learning of Muscle Activation Techniques® of the foot to improve muscle function and joint stability. The course content includes a stronger emphasis on the applications of isolated muscle strength testing, palpation of muscle attachment points along with corrective isometrics for the muscles of the foot. Improving the Interpretation of a Foot Function Comparative Assessment of Mobility (CAM®). Students will learn a new process for assessing range of motion by advancing their skills from an active to a passive range of motion assessment.
MAT485  MAT Wrist and Hand Master Course  6 Credits
Prerequisite: Must be MAT Specialist Certified. Students will advance their learning of Muscle Activation Techniques® of the wrist and hand to improve muscle function and joint stability. The course content includes a stronger emphasis on the applications of isolated muscle strength testing, palpation of muscle attachment points along with corrective isometrics for the muscles of the wrist and hand. Students will learn a new process for assessing range of motion by advancing their skills from an active to a passive range of motion assessment.

MAT490  Capstone  6 credits
Prerequisite: This course may be taken in either of the last two quarters of the student's program. The capstone course is the culmination of the MAT® specialist and advanced mastery coursework, in combination with a variety of business, marketing, human resource, health care management, and health science courses. The student will demonstrate their level of proficiency in this highly integrative course through successful completion of a major project and presentation summarizing the program objectives.

NATURAL SCIENCE AND MATHEMATICS

NS070  Algebra Lab  2 Credits
Prerequisite: None. Co-requisite NS116. This course examines introductory algebra skills. Topics of this course include factoring, solving linear equations and inequalities, linear systems, graphing and evaluating expressions, and operations involving polynomials. Students use graphing throughout the course to explore mathematical applications.

NS105  Biology  4 Credits
Prerequisite: None. This course is an introduction to biological science covering topics in modern biology, including molecular aspects, cell biology, physiology, genetics, evolution and ecology. It increases students’ understanding of scientific inquiry and includes laboratory sessions either live, virtual, or in combination.

NS111  Environmental Issues  4 Credits
Prerequisite or Concurrent: CM121. This is a survey of contemporary environmental problems. The course stresses holistic and ecological approaches, giving special attention to roles, responsibilities and opportunities for individuals in global environmental problem solving.

NS116  College Algebra I  4 Credits
Prerequisite: Advanced Standing or Co-requisite: NS070. Topics of this course include solving linear and quadratic equations and inequalities, linear systems, graphs of equations and inequalities, operations involving polynomials and rational expressions, exponents, radicals and an introduction to exponential and logarithmic functions. Students use graphing throughout the course to explore applications that use functions.

NS140  Anatomy and Physiology I  4 Credits
Prerequisite: None. This is the first of a two-quarter series in anatomy and physiology and the study of the mechanisms by which the human body functions. Major themes are relationships between structure and function within the cellular environment. Topics include anatomy and physiological processes of the skeletal, muscular, endocrine, special senses and nervous systems.

NS150  Anatomy and Physiology II  4 Credits
Prerequisite: None. This is the second of a two-quarter series in anatomy and physiology, continuing the study of the human body. Topics include cardiovascular, lymphatic, respiratory, digestive, urinary and reproductive systems as well as metabolism, nutrition, acid-base balance and fluid, and electrolyte balance.

NS216  College Algebra II  4 Credits
Prerequisite: NS116. Topics include quadratic, transcendental and trigonometric functions and their inverses and properties. Students use graphing to explore analytic geometry of conic sections, build and use simple mathematical models, and use trigonometry to solve problems related to triangles.

NS259  Pre-Calculus  4 Credits
Prerequisite: NS216. This course is an overview of algebra and trigonometry needed to succeed in Calculus. Topics include intervals, inequalities, operations on functions, inverse functions, graphing polynomial and rational functions, binomial theorem, exponential and logarithmic functions, trigonometric functions and formulas.

NS260  Calculus  4 Credits
Prerequisite: NS259. This course is an overview of differential and integral calculus with a focus on applied mathematics. Topics include analysis of tangents and slopes, areas, maxima and minima, and their applications to real world scenarios.

NS305  Statistics  4 Credits
Prerequisite: NS116. This course focuses on descriptive statistics and statistical inference. Topics include data, basic methodologies for gathering data, populations, samples, descriptive measures, probability, sampling distributions, point and interval estimates, hypothesis testing, statistical inference and bivariate data.

NS320  Introduction to Decision Systems  4 Credits
Prerequisite: BS100 or NS116. Many business, management, and economic problems take on recurring patterns. This course is an introduction to operations research, decision systems, game theory and other formal methods of describing and solving problems. Students learn terminology and alternative concepts related to problem solving.
SOCIAL SCIENCE

SS103  Global Citizenship  2 Credits
Prerequisite: None. This interdisciplinary social science course explores the influence of community on global citizenship. Topics include contemporary theories that help define local, national and international community membership in the 21st century. Students will examine how cultural constructs, including, but not limited to, personal perspectives, and social, educational, and professional experiences contribute toward shaping their recognition of, and accountability as, socially responsible community members.

SS116  Introduction to Psychology  4 Credits
Prerequisite or Concurrent: CM121. This course is a basic overview of facts, terms, ideas and research findings that form the basis for modern psychology. The course looks at the science of psychology, considering behavior, perception, learning, memory, human physical and personality development, motivation and stress.

SS140  Interpersonal Relations  4 Credits
Prerequisite: None. This course is a study of the development of interpersonal relations, exploring cognitive, behavioral, attitudinal and contextual interpersonal skills.

SS150  Principles of Economics  4 Credits
Prerequisite: None. This course is an introduction to the basic economizing problem, specific economic issues, price theory and related policy alternatives.

SS205  Sociology  4 Credits
Prerequisite: CM121. Sociology is the study of how social forces such as race, ethnicity, class, gender, sexuality and capitalism shape personality, institutions and cultures in the process of socialization. Topics include research and question construction methods.

SS210  Developmental Psychology  4 Credits
Prerequisites: CM121. The course presents major theories in developmental psychology, including issues and topics across the lifespan such as infancy, childhood, adolescence, adulthood and aging. It emphasizes the biological, psychological and social variables that influence human behavior.

SS311  Human Behavior  4 Credits
Prerequisites: CM121, SS116 or SS140. This course is a study of the influence of sociological, biological and psychological characteristics on various types of human organizations such as families, social groups, organizations, communities and societies.

SS360  Abnormal Psychology  4 Credits
Prerequisite: SS116. This course distinguishes between normal human behavior and psychological dysfunction. Topics include history, causes, treatments and current controversies related to major psychological problems and mental illnesses.

VETERINARY TECHNOLOGY

VT051  Veterinary Foundations of Math  2 Credits
Prerequisite: None. This refresher course covers the arithmetic of whole numbers, fractions, and decimals, including use of real numbers in ratios, percentages, and averages. This course builds on the various ways in which mathematical calculations are used in veterinary technology by providing a translation of animal nursing scenarios into simple, solvable equations.

VT101  Veterinary Medical Terminology  2 Credits
Prerequisite: None. This course is designed to help the student gain a working mastery, both verbal and written, of the language of veterinary medicine. The course emphasizes the structure of medical words and the determination of word meanings based on the prefixes, root words, and suffixes found in combination. Emphasis is also placed on directional and descriptive terms.

VT107  Introduction to Veterinary Technology & Office Procedures  4 Credits
Prerequisite: None. This introductory study of various aspects of the world of veterinary medicine and the role of the veterinary technician within that world. Emphasis is placed on learning the basics of animal identification, husbandry, grooming, animal behavior, and physical examinations. Students learn veterinary office economics and paperwork, medical records management, reminders, financial matters, components to popular veterinary software and the concepts of ethics and professionalism in the work place.

VT148  Animal Anatomy and Physiology  4 Credits
Prerequisite: VT101, NS105. The study of anatomy and physiology using a body systems approach. The student learns functions of the various body systems and the interrelationships among these systems in health and disease. Students learn about the anatomy of small animals using cat cadavers as models.

VT177  Veterinary Pharmacology  4 Credits
Prerequisite: VT101 Prerequisite or Concurrent VT148. This course introduces the student to the development and regulations of drugs and vaccines and their use in veterinary medicine. Commonly used drugs are studied using a body systems approach. Calculation of drug dosages and fluid therapy are emphasized and techniques for medication administration to canine and feline patients is covered.

VT183  Veterinary Imaging  3 Credits
Prerequisite: VT148. Radiation safety and imaging techniques commonly used in veterinary medicine are covered in this course. Students develop radiographic technique charts and practice radiography using live animals.

VT214  Veterinary Hematology  3 Credits
Prerequisite: None. This course begins with a general introduction to the veterinary clinical sciences; it acquaints students with laboratory safety, OSHA regulations, medical asepsis, infection control, zoonotic diseases, glassware, specimen collection, laboratory calculations, and microscopy. This course includes hands-on practice of basic laboratory techniques. This course continues as a study of blood and its various components. Students learn how to properly obtain blood samples, prepare blood smears and perform analysis of the samples, using manual techniques and automated analytical equipment. The functions of the blood cells are emphasized.

BROADVIEWUNIVERSITY.EDU
COURSE DESCRIPTIONS

VT219  Veterinary Parasitology  3 Credits
Prerequisite: None. This course acquaints students with specimen collection and laboratory procedures for parasitology. Students will learn to obtain laboratory samples for diagnostic purposes, properly handle and store those samples as well as perform diagnostic testing. This course emphasizes the study of the internal and external parasitic organisms encountered in veterinary medicine, including life cycles, identification procedures, control methods and public health implications.

VT224  Lab Animals, Exotics and Pocket Pets  3 Credits
Prerequisite or Concurrent: VT183, VT214. This course is a study of non-traditional pets, avians and animal species commonly used in research. Students learn methods of restraint, sample collection and medication administration. Common disease processes are also studied, as well as proper nutrition and husbandry. Zoonotic disease potential and biosecurity-safety measures are also covered.

VT233  Advanced Clinical Laboratory  4 Credits
Prerequisites: VT214, VT219. As an in-depth study of clinical laboratory procedures, students practice sample collection and handling for hematology, parasitology, blood chemistry, urinalysis, microbiology, cytology and serology. Emphasis is placed on the usefulness of these diagnostic techniques in the context of the animal's overall veterinary care. This course includes discussion of various diseases and disorders evaluated by laboratory testing. Zoonotic disease prevention and biosecurity-safety measures are also covered.

VT238  Small Animal Nursing, Nutrition and Disease  3 Credits
Prerequisites: VT214, VT219. In this course, students learn and practice various aspects of animal husbandry and nursing care, including kennel management and sanitation, animal nutritional requirements in health and disease, preventative medicine, and advanced nursing care. Students also learn about some of the more common diseases and disorders seen in veterinary practice.

VT252  Anesthesiology and Pain Management  4 Credits
Prerequisite: VT183, VT233. Co-requisite: VT259. This course prepares the student for the important role of anesthetist in the veterinary surgical team. Drug protocols and anesthesia equipment are studied, along with fluid therapy and pain management. Students learn how to place intravenous catheters, monitor anesthetized animals, and respond to emergency situations.

VT259  Surgical Assisting  4 Credits
Prerequisite: VT183, VT233. Co-requisite: VT252. In this course, students apply their knowledge and skills to animals scheduled for surgical procedures. Pre-surgical assessment and preparation of both the patient and the surgical suite, management of surgical instruments and equipment to maintain sterility, and patient recovery are emphasized. Common types of surgical procedures are studied, as well as the healing process and related client education.

VT268  Dentistry  2 Credits
Prerequisites or Concurrent: VT183, VT252, VT297. In this course, students apply their knowledge and skills to perform routine dental prophylaxis and dental radiographic imaging techniques. A pre-dental assessment and preparation of the patient will be required, along with management of dental instruments and equipment. Dental terminology and common veterinary dental diseases and disorders will be discussed.

VT271  Production Animals  3 Credits
Prerequisite or Concurrent: VT214. This course examines terminology, breeds, anatomy and physiology, husbandry, behavior, nutrition, and medicine as they relate to production animals. Students develop skills in restraint, sample collection, radiology and medication administration for various large animal species. Herd-health management, preventative medicine, and drug withdrawal times are areas of emphasis. The constraints of the ambulatory practice setting are also examined, particularly in the areas of reproduction, surgeries, emergencies, and euthanasia.

VT281  Equine  3 Credits
Prerequisites or Concurrent: VT183, VT214. This course examines terminology, breeds, anatomy and physiology, husbandry, behavior, nutrition, and medicine as they relate to horses. Students develop skills in restraint, sample collection, radiology and medication administration for various breeds. Herd-health management, preventative medicine, and drug withdrawal times are areas of emphasis. The constraints of the ambulatory practice setting are also examined, particularly in the areas of reproduction, surgeries, emergencies, and euthanasia.

VT291  Special Procedures and Emergency Critical Care  3 Credits
Prerequisite or Concurrent: VT233. In this course, students learn and practice various aspects of advanced special procedures, including bandaging, reproductive cycles and management, oncology, advanced ophthalmic procedures, understanding ECG readings and abnormal rhythms, recognition of and response to emergency situations, first aid and CPR.

VT293  VTNE Review  4 Credits
Prerequisite: All core veterinary technology courses (VTXXX). Prerequisite or Concurrent: VT268, VT297. This course will serve to assist the student in preparing for the Veterinary Technician National Exam (VTNE). Successful completion of this exam is required by majority of the states for certificated, licensed or registered veterinary technicians to be credentialed. Mock exams in specific subject areas are an integral part of this course.

VT297  Veterinary Clinical Externship  8 Credits
Prerequisites or Concurrent: VT268, VT293. This course provides for the practical application of the student’s knowledge and skills in an actual veterinary setting, through externship arrangements with area clinics. Each student will be supervised by the campus externship coordinator as well as by a designated extern site supervisor. This clinical rotation is a non-paid position, as it is an extension of the student’s classroom training. Successful completion of the clinical training is required for graduation from the Veterinary Technician program.
